INTRODUCTORY.

TO ANGLERS.

GENTLEMEN,

This season we have, at one stroke, increased our Catalogue of Angling requisites to near upon double its former size. Many descriptions of improved articles and several important new inventions will be found in its pages; these are supplemented with many specialities, combining best quality of skill in construction and of material with the most strict economy in cost of production. Of these may be especially mentioned Rods and Reels.

The new and enlarged buildings recently opened by us will enable a still more prompt and efficient attention to be extended to all home and foreign orders—large and small—that may be entrusted to us during the ensuing season.

As the production of angling requisites occupies the whole of our attention, &c., we have an immense advantage possessed by few, if any, equally large producers of angling requisites.

Having now increased facilities for the production of refined and improved angling necessities, we shall be enabled to construct to order and description customers' own ideas, still more accurate in detail, when differing from articles already stocked.

Our specialities in Rods, Reels, Lines, and in Fly, Mid-water, and Bottom Tackle, generally need no commendation. Steel-centred Rods, Waterproof Silk, and the Acme Metal-centred Lines, centre winches, &c., have now acquired world-wide fame, being extensively used almost wherever a fly is thrown or a bait is spun.

The success of these latest developments in the angler's implements has, we are reluctantly compelled to add, induced unscrupulous traders and makers to victimise the unsuspecting with numerous more or less unworthy imitations, in which durability, utility, and quality of material and workmanship is sacrificed for the sake of a dishonest profit. To ensure satisfaction the intending purchaser will do well to invest in the original, true, and reliable articles.

M842786

The prices in this edition comparing favourably—save in an odd instance or two—with all former catalogues, they will cancel all former quotations.

Having to report a rapidly extending business, we have pleasure in sincerely thanking our ever-extending number of patrons for their kind recommendations—to which the increase is undoubtedly most largely due—and to such as have sent us, unsolicited, the candid reports of their experience of our tackle.

We may state, in conclusion, that we trust our efforts to merit the satisfaction of our patrons in the future will be as successful as they have been during the past half century.

We are, Gentlemen,

Your obedient servants,

D. & W. H. FOSTER.

TERMS AND HINTS IN ORDERING GOODS.

We send all Goods amounting to £2 and upward Carriage and Post Paid (Inland), and an allowance is made on Foreign Packages *when Cash Accompanies Order*.

With Cash Orders we also allow a discount of 5 per cent. on parcels value over £1; over £6, 7½ per cent.; over £12, 10 per cent. The cost of booking and repeated postages, &c., being found to be considerable, we make it a rule to receive cash from all *new correspondents*, giving them the benefit of the above terms, which are *unequalled* in the trade.

Returned Empties must be carriage paid, and cannot be credited until received, when, if in good condition, full price will be allowed.

Parcels of goods sent on approval on receipt of a deposit from new clients.

Post Office Orders are preferred for small amounts, though stamps are received.

We shall feel greatly obliged if our correspondents will quote List No. of articles required, with their descriptions of alterations, if any, &c., required.

LIST OF RODS.

BEFORE describing our range of rods, we would like to state, for the special benefit of the intending purchaser, that we send rods for choice on receipt of a cash deposit amounting to half the value of the rods selected to be submitted on approval. By this arrangement we are enabled to reach our clients everywhere in a manner most satisfactory.

The above system of supply has proved so increasingly successful in suiting the needs of the ever-extending army of anglers, who are habitually the users and the commenders of our improved and refined requisites, that we are now prepared to extend to new correspondents and old patrons alike the benefits thus offered. Our rods are an embodiment of best possible workmanship and best materials, and when we add that we employ, first best appliances only, for accurate building, &c., the query—"How is it Foster's rods are so much the rage?" needs not a long pondered reply.

We produce rods at varying prices for all kinds of rod fishing, and to strangers to our productions who need proof to convince, we would suggest that they CONTRAST our lowest or highest priced fly or other rod with any rod to be got ANYWHERE, EITHER AT HOME OR ABROAD, at the same price; as there is invariably less value given in every way, we with confidence invite the test. Several imitators of our rod improvements, and particularly of the steel centre, taking advantage of the universal demand, have had the hardihood and cool audacity to advertise their piracies 75 to 100 per cent. more in price than that of the original and genuine article. Owing to a clever regard to the bounds of legality, these unscrupulous freebooters have hitherto contrived to avoid the trammels of the legal net, but seeing that a limp and wayward piano string is the nearest approach they make to our stiff, needlelike,

In ordering please quote List Nos. of articles required.

stout, and strong, yet slender, steel backbone, we are anxious only to save the unsuspecting from a bold, unprincipled imposition.

Steel centred rods were introduced by us some six years since. So great was their success over the ordinary build of rod, that the Gold Medal and Diploma of Honour was awarded them at the International Fisheries, London, 1883, and highest awards have been ever since gained by them at other exhibitions wherever exhibited.

None but they who habitually use a good rod are able to comprehend the immense advantages derived from its use. What the bow is to the successful archer, or the bat to the crack batsman, so is the rod to the expert fisherman. It is the medium of success. Given a good rod, even in the hands of a comparative novice, if the fish are on the feed, the chances are he meets with success, but with an unduly stiff, or a weak backed, "swoppy," unmanageable, ill-made implement, even the proficient is nonplussed, exasperated, and, for the time being, undone.

In commencing our Catalogue of Rods for the year 1887, which in scope and variety, beginning as it does with well-made keeper's rods, suited equally with our latest and best specialities for hard and constant use, will be found to compare favourably with that of any contemporary manufacturers, whether British or foreign; this especially in the three cardinal points most studied by us, viz., utility of design, quality of workmanship and material, economy in cost and price. On these points our experience and success, seen in the reception accorded our inventions, both by our patrons and by trade pirates, enables us, without egotism, to say "we hold the field."

TROUT SPINNING RODS.

NO.

| NO. | | s. d. | |
|------|--|-------|----|
| | | s. | d. |
| 661. | Three-joint Hickory Spinning Rods, brazed and winch fitted, in case, 9 and 10 ft., 4s. 6d., 5s. 6d., 6s. 6d., and | 7 | 6 |
| 662. | Ditto ditto 10 and 12 ft., two tops, &c, 7s. and | 8 | 6 |
| 663. | Four-joint ditto 8s and | 10 | 6 |
| 664. | Ditto, best quality, with new upright safety, or solid rings, a first-rate rod in all points, 11s. 9d., 13s., and | 14 | 6 |
| 665. | Ditto, extra finish | 16 | 6 |

In ordering please quote List Nos. of articles required.

| NO. | | s. | d. |
|------|--|----|----|
| 666. | East India Cane Rod, 12 ft., light, solid at joints, strong, and pliant, winch fitted, in case ... | 12 | 6 |
| 667. | Ditto, with solid or rustless steel upright rings, and best finish... .. | 16 | 6 |
| 668. | Four-joint East India Cane Rod, winch fitted, 12 ft., in bag | 15 | 6 |
| 669. | Ditto, best quality, two tops, &c., 12 ft. 19s. 6d., 14 ft. 21s., 16 ft. 23s. 6d., 18 ft. 26s., and 20 ft. | 29 | 6 |
| 670. | Ditto, with superior mounts, and double brazed, balanced handle, and solid winch fittings, very light. A splendid rod for fine trouting. It is equally suited for minnow and worm. In three joints, with two tops, 10 to 12 ft. | 30 | 0 |
| 671. | Ditto, with four joints, 10 to 12 ft. | 32 | 6 |
| 672. | Ditto, 14 ft. 35s. 6d., 15 ft. 37s., 16 ft. 38s. 6d., and 18 ft. | 40 | 0 |
| 673. | HEXAGONAL BUILT CANE TROUT SPINNING RODS, in three joints, with two tops, 10 ft., either pliant, medium, or strong build, either cane or waterproof silk bound, inlaid, cedar, cork, or pigskin covered handle, with upright safety rings | 52 | 6 |
| 674. | Ditto ditto with bayonet lock joints, and steel rustless upright wings | 59 | 6 |
| 675. | Ditto, with steel centre | 79 | 6 |
| 676. | First quality built Cane. | | |

Two long tops, three joints, best mounts, inlaid, cedar, cork, or bound cane handle, oxidized or nickled metal fittings, and best finish action. Either moderately stiff, pliant, or medium.

Prices :—10, 10½, or 11 ft., 75s. 11½ ft., £3 18s.; 12 ft., £4 1s. 6d.; 13 ft., £4 8s.; 14 ft., £4 15s.; 15 ft., £5 12s. 6d.; 15 ft., £6 8s. 6d.; 17 ft., £6 17s. 6d.

The best possible combination of workmanship and material is here worked up, and with a result that is found to eclipse any other make, either English or American. We guarantee this rod for two years to the purchaser, and if found in any way defective, after fair usage, during the period named, we engage to supply a new rod, or refund the cash paid for the defective implement. It will be obvious to all that were we not confident of the immense superiority of this article, we should not give a sweeping guarantee of this character with a light and delicately constructed article. This rod is, as we have above stated, made in the best possible style.

In ordering please quote List Nos. of articles required.

| NO. | | s. | d. |
|------|---|----|----|
| 677. | If steel-centred, 16s. 6d. extra trout, 18s. lake, and 19s. 6d. extra salmon. | | |
| 678. | Two-joint ditto, with extra short top or butt joint, 10 to 11 feet | 62 | 6 |
| 679. | Second quality ditto The two foregoing rods are each 9s. 6d. extra if steel centred. | 54 | 6 |
| 680. | Cane and greenheart, built alternately, same price as above. | | |

FLY RODS—TROUT AND GRAYLING.

| | | | |
|------|--|----|---|
| 681. | Good serviceable three-joint Hickory and Lance Rod, with strong durable mountings, winch-fitted, in case The above is adapted for hard wear, is durably constructed, and is the best value offered in youths' rods. It compares favourably with rods usually sold at double the cost. | 5 | 9 |
| 682. | Three-joint ditto, extra finish, 10 to 12 feet... .. | 7 | 6 |
| 683. | Three-joint ditto, bronzed ferrules and best finish, 10, 10½, 11, 11½ to 12 feet | 8 | 9 |
| 684. | Four-joint (682 quality), 11 and 12 feet | 9 | 6 |
| 685. | Ditto, best finish | 10 | 6 |
| 686. | All Greenheart Fly Rods, good plain mounts and finish, three joints, winch-fitted, 10 to 12 feet, screw spear, in partitioned case | 10 | 9 |
| 687. | All Greenheart, three-joint, 10 feet, best finish, mush- room button, relieved bronzed fittings, in partitioned case | 16 | 6 |
| 688. | All Greenheart, double-brazed, three joints, bronzed fittings, screw spear, 11 feet, in partitioned case ... | 19 | 6 |
| 689. | All Greenheart, three-joint, 12 feet ditto, ditto ... | 21 | 6 |
| 690. | All Greenheart, two-joint, Derbyshire Switches, 10 to 12 feet, bronzed metal mounts, first class action, screw spear, &c., in partitioned case... .. | 17 | 9 |

In ordering please quote List Nos. of articles required.

| NO. | | s. | d. |
|---|---|----|----|
| 691. | The "Princess" Ladies' Rod, two joints, double brazed, all Greenheart, balanced handle, average weight: 10 feet, 6 oz.; 11 feet, 7 oz., &c.; with mushroom at butt end, and of best finish—a "perfect gem" of a light and useful rod, made either strong in action or pliant | 25 | 0 |
| 692. | Three-joint Rod in best Hickory or Blue Mahoe, and best picked Lance, two long tops, balanced grooved handle, bronzed fittings, screw spear, in partitioned case | 21 | 0 |
| 693. | Ditto, best quality double brazed | 26 | 6 |
| 694. | The "Standard" Rod, balanced handle, double brazed, two fly tops, bronzed ferrules, screwed spear, all greenheart, 11 feet and 12 feet | 25 | 0 |
| 695. | Ditto, ditto, 12½ feet and 13 feet | 26 | 6 |
| 696. | Whole East India Male Cane Fly Rods, balanced handle, solid winch fittings, two tops (of greenheart), 10 to 12 feet. A first rate Rod for heavy work, light (about ¾ oz. per foot), stiffish in action ... | 29 | 6 |
| 697. | Five-joint Knapsack Fly Rod, Greenheart or Blue Mahoe, best bronzed fittings, finish, and winch fits, suited to cyclists, tourists, &c. | 30 | 0 |
| Nos. 683 and 684 may be had with hollow butt, price 2/6 each extra. | | | |

BEST QUALITY ALL WOOD FLY RODS.

FOR TROUT AND GRAYLING FISHING.

Made from most carefully selected and tested Greenheart. (Specific gravity: dark coloured, 1·0908; light ditto, 0·9643; Washaba or "Bethabara," 1·2140; and Snakewood, 1·3718.*

* We have discontinued using Blue Mahoe (except when expressly ordered), owing to the distinct inferiority of even the best descriptions when compared with the woods named above.

In ordering please quote List Nos. of articles required.

6 FOSTER'S LIST OF REFINED AND IMPROVED

| NO. | | s. | d. |
|---|--|----|----|
| 698. | Three-joint very best Fly Rod, double brazed, finest solid winch fittings, two cane-tipped or whole wood tops, divisioned case, 10, 10½, 11, 11½, and 12 feet | 35 | 0 |
| 699. | Three-joint ditto, with Mushroom at foot of butt, and new Cap-covered Spiral lock joint | 38 | 6 |
|  | | | |
| 700. | Three-joint very best Fly Rod, cane-wrapped handle, and with either mushroom or button termination or spear, weigh 10, 11, and 12 oz. | 37 | 6 |
| | This Rod was awarded a Prize Medal at the International Fisheries Exhibition, London, 1883. | | |
| 701. | Three-joint best rod, fitted with the new centre winch (detachable), rod and reel combined, balanced handle | 39 | 6 |
| | This Rod is similar in appearance to that shown on Plate V. (Fig. 1). | | |
| 702. | Castle Connell Rods, two-joint, 10 to 12 ft., spliced, best | 19 | 6 |
| 703. | Two-joint ditto, two tops, best, 10 to 12 ft. | 25 | 6 |
| 704. | Three-joint ditto, ditto ditto | 29 | 0 |
| 705. | Ditto ferruled joints instead of spliced joinings, 10 to 12 ft. | 28 | 6 |
| | If bound in cane or leather, 2/9 extra. | | |
| 706. | Three-joint very best finished Fly Rod, bronzed fittings, in grooved wood case | 59 | 6 |
| 707. | Ditto, ditto, with solid white metal mounts | 68 | 6 |
| 707½. | "Marston" Fly Rods 17s. 6d. and | 21 | 0 |

In ordering please quote List Nos. of articles required.

SOLID HEXAGONAL GREENHEART FLY RODS.

ALSO IN WASHABA, &c.

These Rods are stronger for weight and size than the round make of rod without steel centres, and the extra stiffness thus imparted brings the play nearer that of the metal-cored rods than any other all-wood implement.

| NO. | | s. | d. |
|------|---|----|----|
| 708. | Three-joint, best bronze ferrules. Either two best long tops and single brazed, or one best top and double brazed, with spear or mushroom at butt end, and in partitioned case, 10 to 12 ft. | 31 | 6 |
| 709. | Ditto, ditto, best solid winch fittings and finish, double brazed, 10 to 12 ft. | 38 | 6 |

BUILT CANE FLY RODS.

BEFORE CEMENTING.

Sections showing system of building.

AFTER CEMENTING.

Diagonal cane-built rods were originally made in this country some forty-seven years ago. They were not only spliced in the manner shown in the above sections, but in addition, at intervals of every foot, or less, along the rod's joints, in the same way as is it usual to splice a top. This necessitated the rods being almost one half covered with wrappings. This idea seemed to be that the periodic round rim or joint on single cane was untrustworthy, and was not in consequence fit for use. The plan of planing the raised knot-like rim, which is the hardest part of the cane, to an even surface, and thus building full-length parts or joints without the presence of constantly occurring masses of silk bindings, is of a much later date. This was perhaps not so important an advance

In ordering, please quote List Nos. of articles required.

as was the discovery of a cement or composition impervious to the effect of water, in lieu of the old style glue which did not always prove satisfactory in use. So great and reliable an improvement is the compound now used, that we have resorted to the plan of giving a guarantee for two years with all best cane-built rods sent out by us, with and without steel centres.

NO.

710. Hexagonal built cane Fly Rods, three joints, 10 ft., 45s.; 11 ft., 48s. 6d.; 11½ ft., 50s.; 12 ft., 51s. 6d.
711. Ditto, ditto, superior finish, 10 ft., 52s. 6d.; 10½ ft., 54s.; 11 ft., 55s. 6d.; 11½ ft., 57s. 6d.; 12 ft., 60s.
712. Ditto, best, with two tops and bound handle, bronzed fittings, 10 ft., 63s.; 10½ ft., 65s. 6d.; 11 ft., 68s.; 11½ ft., 70s.; 12 ft., 73s. 6d.
713. Ditto, with best finish and the most minute precision in build and detail, &c., 10 ft., 69s. 6d.; 10½ ft., 71s.; 11 ft., 73s. 6d.; 11½ ft., 75s.; 12 ft., 76s. 6d.

Above with cork, inlaid cedar, or cane-bound handles. If white metal mounts are used, the cost is 9s. 6d. extra. If fitted with the new revolving "Bickerdyke" Rod tip ring (Patent No. 6232), 1s. 6d. extra. Bronzed lock joints, 4s. 6d. extra. The new spired cap covered joint, 5s. 6d. External screw cap lock joints, 3s. 6d. extra.

THE REVOLVING BICKERDYKE ROD END RING.

714. Best possible finished Cane Built, with white metal mounts, &c., 10 ft., 90s.; 10½ ft., 91s. 6d.; 11 ft., 93s. 6d.; 11½ ft., 95s. 6d.; 12 ft., 98s.

Copy of Guarantee given with each of the two best qualities of Cane Built Rods described:—

In ordering, please quote List Nos. of articles required.

"We, the undersigned, herewith do engage to refund cash, or supply new rod, if the Cane Built Rod, No. —, fails to withstand any and every fair angling test for two years from date of purchase.

"Dated this day of 188 .
(Signed) "D. & W. H. FOSTER."

"Who could undertake, single-handed, to produce a glued-up Cane Rod, with its multitudinous whippings, rings, varnish and ferrules, and, as I have said, generally exquisite finish, for, say, three guineas? Yet such firms as Messrs. Allcock or Messrs. Foster, of Ashbourne, can, by the perfection of their manual and machine labour, unendingly perform more than this. They can produce tackle so that the London or provincial retailer can sell, with a profit, at the price named."—From "How Fishing Tackle is made," appearing in *The Squire*.

AMERICAN MADE SPLIT OR BUILT CANE RODS.

FITTED WITH THE NEW SERRATED FERRULE
FOR JOINTS—MALLESON'S REGISTERED.

Fig. A shows the serrated ferrule, as fixed before the silk bindings are added.

Fig. B. The ferrule in its finished state.

It is a well-known fact that the early pattern of split cane rods failed to merit satisfaction largely through the bad fitting and shape of the joint ferrules. Our make of these rods are fitted with ferrules, hexagonal shaped, to fit or cover over the cane without the most remote chance of injury to the cane enamel or rind. The serrated ferrule arrangement works equally satisfactory.

In ordering, please quote List Nos. of articles required.

715. Two joint rod, with extra top joint, and with cork or cane bound handle, 10 to 11 ft., 61s. 6d.
716. Ditto, three joints, two tops, with East India cane landing net handle to hold extra top, and with cork or cane bound handle, 6gs. 6d. Inlaid cane and cedar butts, 7s. 6d. extra.

GOLD MEDAL STEEL CENTRED FLY RODS.

Gold Medal awarded at the Great International Fisheries Exhibition, 1883, and gold or highest award at every subsequent exhibition where-ever exhibited.

Steel centred rods were invented by the Author of the "Scientific Angler." They, together with other important improvements in anglers' requisites, emanating from the same source, have been pirated in a very shameless way, even by individuals holding more or less respectable positions in the trade.

This we mention as a proof of the great success of the invention which we introduced so late as 1882. There is almost as much difference between a stiff steel spring cored fly rod and a heavy all-wood weapon, as there is between a modern Colts' six-shooter and an old horse pistol. Steel as a propelling medium gives, at the least expenditure of motive force, the most satisfactory response and results on delivery of the line. Through its agency wrist action largely takes the place of the full arm and elbow motion needful in wielding the more cumbersome and weighty implement. The steel centred rod, as first introduced, was of greenheart. This rod promised so satisfactorily that we have since extended the principle to built cane rods. These are warranted for two years, in common with our other built cane and steeled rods. We append a few extracts from reviews by several important angling writers, that have appeared since our invention has been made public.

In ordering, please quote List Nos. of articles required.

The following appears in "Fishing Tackle: its Materials and Manufacture," by J. Harrington Keene.

"In this recent development in solid wooded rods the inventor's aim has been, first, strength and durability; second, pliancy and lightness; and, lastly, the consequent reduction of length and *condensation* of *power*. That these objects have been attained . . . there is ample testimony . . . continually accumulating from habitual users. The presence of the steel core in the butt only serves to strengthen a ten or eleven foot rod so as to render it capable of casting an equal distance with an all-wood tool having 18 inches the advantage in length, whilst lightness and precision in the output of line is more marked in the case of the former. With two joints (out of a total of three) steeled, these advantages are the more manifest. The spring derived from the presence of the metal core has an effect difficult verbally to describe—such are the working results of the backbone thus instilled. The easing nature upon the hand and arm incurred by its use is so significant, that anything short of a practical test can only impart an imperfect impression of its appreciable qualities. Wrist action only is all that is called into play in the delivery of an average output of line, and by this motion the perfect swing of the implement pays forward the length equally with ease and precision. There is also another advantage in the build of this rod. The reel is made inside the butt, so to speak, and thus all the nuisance of the line entwining round the reel is entirely avoided."

Extract from the "English Fishing Gazette."

The Editor says, "Foster's patent steel-centred fly rod is an extremely neat little weapon, and throws a fly very nicely indeed. The butt has a fine steel core which gives more spring and elasticity, combined with strength, than one could otherwise get out of a rod of the same size. We are told these rods have been received with great approval. Some are fitted with the new centre-fitting winch, which is the most perfect arrangement of the winch to prevent the line catching."

In ordering, please quote List Nos. of articles required.

It is very neat, and is said to be liked by those who have tried it. It works inside the butt, as it were."—July, 1883.

These rods have been most favourably critized in the "American Angler" (the critic in this instance, of course, endeavours to trace the idea to a Yankee source), *The London Times*, *Evening News*, &c., and "The Naturalist Flyfisher," &c., &c.

Had we space, we might give many more highly favourable extracts from the reviews of our International Exhibits, from the leading London, New York, and other journals; but as we have no wish to weary the reader by needless repetitions, we pass on to a few reports from habitual users, which are fair samples of what are continually arriving from our clients everywhere.

EXTRACTS FROM UNSOLICITED TESTIMONIALS.

"Headingley, Leeds.

"That steel-centred Fly Rod you made for me gives very great satisfaction. I have killed fish this season with it which I know it would have been impossible to secure with an ordinary rod, and everybody who sees and handles it is much pleased.

"Sept. 21st, 1886.

"C. J. BURTOFT."

"Wellgarth House, Armley, Leeds.

"I cannot speak too highly of the steel-centred rod you sent me, it is simply perfection—casting made easy.

"May 10th, 1885.

"FRED HALL."

"83, Old Town Street, Plymouth.

"I had not the opportunity of trying your rods until last evening. At first I felt like the fellow in the "Beggars' Opera." "How happy could I be with either," &c. I liked both, but for different reasons I

In ordering, please quote List Nos. of articles required.

like the winch fittings on the wood rod, and I like the steel core and finish of the above. We have the largest pianoforte saloon in the West of England, so that I could give them a good trial with a line, one against the other. The wood rod would not throw more than 14 or 15 paces, while the other sent the line more than 18, with greater ease and perfectly straight. The question arises, If the steel core in the butt makes this difference, what is it with two joints steeled?

"April, 13th, 1885.

"E. H. C. PROUT."

[From Later Letter.]

"The steel centred trout rod I had of you last season does its work very well indeed, and answers very well for spinning with the stiffer top.

"June 21st, 1886."

"Newport House, Eardisley, R.S.O.

"I find your rod with a steel centre very good, and that it throws a good line.

"March 9th, 1886.

"W. F. TAYLOR."

From J. Harrington Keene, Author of the "Practical Fisherman," &c.

"The rod is a perfect little beauty.

"July 7th, 1883."

"Temeside Villas, Ludlow, Salop.

"The rod came to hand safely yesterday forenoon. I tried its virtues last night, and am exceedingly well pleased with it, as well as with the 'Acme Line' and flies. I shall have great pleasure in commending your manufactures to all my angling friends.

"J. W. HENRY SMYTH."

"Moor Street, Burton-on-Trent.

"I am well satisfied with that steel-centred rod you made for me.

"Feb. 21st, 1887.

"J. HUNTER."

In ordering, please quote List Nos. of articles required.

"Brook House, Newcastle, Staffs.

"The rod is the best and nicest I have ever handled, and, notwithstanding its lightness, is extremely powerful. I shall always be pleased to recommend your rods.

"August 11th, 1884."

"F. C. B. SAINSBURY.

"Downham Market, Norfolk.

"You may remember I purchased a salmon rod of you some two years since, it was one of your new steel-centred rods, *and I have found it everything I could wish*. I should now like to have a single-handed trout rod upon the same principle. Please send me several for selection.

"Feb. 14th, 1887."

"CHAS. HAWKINS.

"Lloyds' Old Bank, Stafford.

"I was very much pleased with the steeled rod you sent me. I have shown it to many of my friends, who like it very much.

"W. St. GEORGE COLDWELL."

PRICE LIST OF STEELED FLY RODS.

Section 1, showing the method of Dovetailing Steel Centre in Greenheart Rods.

Section 2, showing the Treble-built Steel-Centred Cane Salmon Rods.

Section 3, showing Double-built Trout and Salmon Steel-Centred Cane Rods.

PRICES OF THE ORIGINAL STEEL- CENTRED FLY RODS.

NO.

- | | | | |
|------|--|-------|------|
| 717. | Best three-joint Fly Rod, stout steel bar in butt, with side-winch fittings, balance handle, two tops, best bronze mounts and finish, 9, 10½, 11, 11½, and 12 ft. | s. d. | 45 0 |
| 718. | Steel bar in butt and middle joints, &c., &c., 9 to 12 ft. | 47 6 | |
| 719. | Steeled butt, with centre-fitting winch (patent), as per illustration, two tops, &c., best finish, 9 to 12 ft.... | 53 6 | |
| 720. | Steeled butt and middle joints, 9 to 12 ft. | 62 6 | |

If double-ringed, as shown on illustration, 3s. extra. If cane-bound handle, 3s. extra. If lock joints are added, 3s. 6d. extra. Patent, or with waterproof joints, 2s. 6d. extra. Steel standing rustless rings 2s. 9d. extra.

Any of the above may be fitted to a rod if required.

STEEL-CENTRED, CANE-BUILT, GOLD MEDAL
FLY RODS.

These rods have been awarded gold and highest awards at the London, Edinburgh, Liverpool, and other Exhibitions wherever exhibited.

They are guaranteed for two years to the purchaser.

No other cane-built, steel-centred rod in the market is guaranteed to last any specified time.

We know our productions to be reliable, we therefore give the guarantee note that accompanies each of our rods.

Cane-built Fly Rods, three joints, best material and workmanship, steel in butt and middle joints, bronzed metal mounts, with cork or cane covered handles.

721. 10 ft., 79s. 6d.; 10½ ft., 81s. 6d.; 11 ft., 84s. 6d.; 11½ ft., 87s. 6d.; 12 ft., 91s. 6d.

722. Ditto, ditto, with two tops, and steeled throughout, 10 ft., 93s. 6d.; 10½ ft., 95s. 6d.; 11 ft., 98s. 6d.; 11½ ft., 102s.; 12 ft., 105s.

723. Ditto, ditto, very best white metal mounts, spiral cap, screw, or bayonet lock joints, with cedar inlaid, pig skin, morocco, or cork covered or caned handles, weight from 9 to 12 oz., 10 ft., 98s.; 10½ ft., 102s.; 11 ft., 105s.; 11½ ft., 110s.; 12 ft., 117s. Revolving "Bickerdyke" rod tip ring 1s. 6d. extra. Grooved wood cases (in lieu of rod bag), 15s. extra. Name and address engraved on butt, 1s. 9d. extra. Fitted with upright rustless single rings (light and strong), 2s. 6d. extra.

724. Two-joint Built Cane Steel-centred Rods, with short "Prince Albert" Butt, best finished, 10½ and 11 ft., 63s.

725. Three-joint Built Cane ditto, with Greenheart Butt, best finished, 10, 10½, and 11 ft., 64s. 6d.

726. Ditto, with two long tops, 75s. 6d.

In ordering please quote List Nos. of articles required.

DOUBLE BUILT CANE FLY RODS (SEE DIAGRAM
ON PAGE 15) WITH STEEL CENTRES.

These rods are as near perfection as it is possible to bring them. They are the strongest and stiffest trout rods built, giving a greater casting power for weight over any and every description of rod for fly or surface fishing.

727. Prices, with all latest improvements as above referred to, including steel centre throughout, with the new patent water-proof joint ferrules, 10 ft., 172s. 6d.; 10½ ft., 176s.; 11 ft., 182s. 6d.; 11½ ft., 190s. 6d.; 12 ft., 195s.

SALMON AND SEA TROUT BUILT CANE STEEL-
CENTRED GOLD MEDAL RODS.

728. All the following are warranted with the foregoing for two years. Three joints, best make and finish, with first quality metal mounts, double brazed, with either cork covered, cane, or leather bound handle, rubber butt end button, &c., &c.
13 ft., 91s. 6d.; 14 ft., 102s.; 15 ft., 122s.; 16 ft., 140s.; 17 ft. 149s.; and 18 ft., 160s.
729. Ditto, ditto, with two tops, and bayonet, screw cap, or "Internal Spiral" lock joints. 13 ft. 105s.; 14 ft., 110s.; 15 ft., 125s.; 16 ft., 137s.; 17 ft., 159s.; and 18 ft., 170s.
730. Ditto, first best build and finish, 13 ft. 120s.; 14 ft., 129s.; 15 ft., 140s.; 16 ft., 160s.; 17 ft., 180s.; and 18 ft., 195s.
The last named range are fitted with all latest improvements.
731. Double-Built Cane, Steel-Centred Fly Rods. Same as No. 714, but double built, 13 ft., 197s. 6d.; 14 ft., 205s.; 15 ft., 210s.; 16 ft., 218s.; 17 ft., 227s. 6d.; and 18 ft., 237s.
732. Treble-Built ditto, for heavy Salmon and Masheer fishing, £4 per rod extra, with steel centre throughout, and all improvements.
The Treble-Splice build of rod is light and excessively stiff, and strong for weight. These qualities are of the

utmost service and utility to the user, seeing that greater strength is given with the least possible increase of weight and length.

STEEL-CENTRED BUILT CANE BEST BOTTOM RODS.

733. Built Cane Steel-Centred General Bottom Rods. Three joints, two tops, well built and finished with new safety upright rings, with either cork, waterproof braid bound, or pig skin handle, 10 ft., 76s.; 10½ ft., 83s.; 11 ft., 87s. 6d.; 11½ ft., 90s.; and 12 ft., 95s. Action either stiff, medium, or pliant.
734. Three-joint ditto, very superior quality, 10 ft., 79s.; 10½ ft., 89s. 6d.; 11 ft., 99s.; 11½ ft., 112s.; and 12 ft., 125s.
735. Ditto, ditto, in four joints, 10 ft., 89s. 6d.; 10½ ft., 104s.; 11 ft., 120s.; 11½ ft., 137s.; and 12 ft., 149s. 6d.
736. Three-joint best quality Spinning and General Built Cane Steel-Centred Rod, with best white metal mounts, steel rustless standing rings, lock joints (of either description previously referred to), two tops, cane, cork, or pig skin covered handle, any action wished, 10 ft., 98s.; 10½ ft., 102s.; 11 ft., 105s.; 11½ ft., 112s. 6d.; and 12 ft., 118s. Ditto for Salmon, Pike, Mahseer, &c., &c.

The following are made in different degrees of strength and consequent weight suitable for the particular kind of work they are intended for. Though a light rod of this kind will stand the heaviest angling test it is possible to subject them to in inland waters, still we like to supply precisely what our clients may wish to order, as when one gets accustomed, after years' habitual use, to a particular "play" of rod, it is difficult to suddenly fall into the handling of a more pliable or stiff tool. Extra lightness with an excess of power, however, always proves acceptable.

737. Three-joint rods, same quality, &c., as No. 711, with steel centre, 13 ft., 98s. 6d.; 14 ft., 102s.; 15 ft., 122s.; 16 ft., 140s.; 17 ft., 149s.; 18 ft., 160s.; and 20 ft., 195s.
738. Ditto in four joints, £1 extra.

In ordering, please quote List Nos. of articles required.

739. Three-joint ditto, with two tops and lock joints (bayonet, internal spiral or screw cap design), 13 ft., 105s. ; 14 ft., 110s. ; 15 ft., 125s. ; 16 ft., 137s. ; 17 ft., 159s. ; 18 ft., 170s. ; 19 ft., 181s. ; and 20 ft., 195s.
740. Ditto in four joints, 25s. extra.
741. Ditto, ditto, first best build and finish, 13 ft., 120s. ; 14 ft., 129s. ; 15 ft., 140s. ; 16 ft., 160s. ; 17 ft., 180s. ; 18 ft., 197s. ; 19 ft., 212s. ; and 20 ft., 223s.
742. Double and Treble-Built Steel-Centred Salmon and Masheer Rods, three joints, best quality, same as No. 714, but double built as per section No. 3 on page 15, 13 ft., 157s. 6d. ; 14 ft., 168s. ; 15 ft., 175s. ; 16 ft., 190s. ; 17 ft., 205s. ; 18 ft., 237s. ; 19 ft., 250s. ; and 20 ft., 260s. If treble-built for extra heavy work, with all extra improvements, price £4 extra.
743. Short Two-joint Cane-built Pike and Trolling Rods, steel centres, best build, 9 ft., 59s. 6d. ; 9½ ft., 62s. 6d. ; 10 ft., 65s. ; 10½ ft., 67s. 6d. ; and 11 ft., 70s. If double-built, £2 10s. extra.

The new centre winch is fitted to any cane-built rod at a cost of 14s. 6d. extra, trout size (*i.e.*, up to 2¼ inch reel), and 29s. 6d. salmon size (*i.e.*, up to a 3½ inch diameter reel, with a capacity of 120 yards salmon size of line). These latter are fixed to admit of there being a foot of hand room below the winch. A two handed rod thus has the reel in the middle of the handle, one hand being above and the other below the centre winch in use.

All the above Lake and Salmon Rods are guaranteed for two years.

We have not further space to devote to the publication of further Press extracts, &c., as we have a largely increased range of rods to catalogue this year, and many highly favourable notices that have appeared in the leading British and other sporting journals are crowded out.

OUR BEST ALL WOOD SALMON AND LAKE TROUT FLY RODS.

No.

744. The "Ne Plus Ultra" Salmon Rod, three joints in Greenheart, first-class action and finish, long balanced or swell handle, cane, waterproof braid bound or cork covered. Double brazed, two tops, in case—13 ft., 31s. 6d.; 14 ft., 37s. 6d.; 15 ft., 43s. 6d.; 16 ft., 49s. 6d.; 17 ft., 51s.; and 18 ft., 55s. If name and address is engraved on butt, 1s. 9d. extra.
745. Three-joint Lake and Salmon Rods in Greenheart or Washaba, best built and finished, two tops, single brazed, gradual tapered butt, with rubber button or mushroom, in case—14 ft., 37s. 6d.; 15 ft., 39s. 6d.; 16 ft., 45s.; 17 ft., 49s. 6d.; 18 ft., 54s.; and 20 ft., 61s. 6d.
746. Ditto, double brazed ditto, with best solid winch fits metal lined, strongly built, and elegantly finished—14 ft., 41s. 6d.; 15 ft., 45s.; 16 ft., 49s. 6d.; 17 ft., 54s.; 18 ft., 58s. 6d.; 19 ft., 61s. 6d.; and 20 ft., 65s.
- Butts bound with cork, cane, or leather, 3s. each extra.

FOSTER'S FAMOUS ALL GREEN- HEART SALMON AND LAKE TROUT FLY RODS.

BEST MATERIAL, BUILD, AND FINISH.

747. Three-joint rubber button, two tops, &c., in case—13 ft., 29s. 6d.; 14 ft., 32s.; 15 ft., 34s. 6d.; 16 ft., 37s. 6d.; 17 ft., 39s. 6d.; 18 ft., 44s.; 19 ft., 49s. 6d.; and 20 ft., 55s.
748. Ditto, in four joints, 5s. each rod extra.
749. Castle Connell All Greenheart Rods, made from the most choice wood lengths in three joints, without splices, with solid winch fittings, double brazed, best build and finish, two tops in case

In ordering, please quote List Nos. of articles required.

If made with rustless steel upright rings 6d. extra.

A FEW HINTS RE RODS.

The following golden rules we commend to the notice of possessors of built and other best rods :—

1. Never leave a wet case upon a rod after use.
2. Keep the rod in a dry place.

In ordering, please quote List Nos. of articles required.

3. Grasp the joints near the ferrules when fixing or unfixing same.
 4. If the joints or parts stick obstinately together after having been used wet, hold a light under the fast ferrules until steam issues therefrom, when they may be parted with ease.
 5. Lastly, when the season is over, see to the rods having ragged wrappings and missing rings replaced, and a good protecting coat of water-repelling varnish being given if at all needed.
- A moderately careful adhering to above simple rules will enable a good rod to withstand wear and tear almost everlastingly.

ON THE CHOICE OF A ROD.

From the *Scientific Angler*.

The Rod forms the first subject for attention; the winch, or reel and line being next chosen, with a view to the harmonious working of the whole, the reel to balance, and the line to suit the "play" of the tool. This is of the most vital importance. The Rod, Reel, and Line should be well adapted to act perfectly and in concert with each other. We have already pointed out the inconvenience and disaster arising from the common practice of employing implements totally incapable of working together evenly. The length of a rod, as is now well-known, has very little to do with the distance it can be made to cast the fly; the casting powers entirely depend on the pliancy and strength.

The result of our investigations is, that a combination of the best metal and the best wood, would, if arranged correctly, and in right proportions, be an advance in a desirable direction. We therefore had a rod made of the very best of strong woods, with a *fine bevilled steel centre*, and this proved when, after some alterations, it was completed, to bear out the hopes conceived in respect to it. We had been enamoured of this idea theoretically, practically it gives every promise of ultimately meriting the pains and researches we bestowed upon it.

In ordering, please quote List Nos. of articles required.

L I N E S.

THE ORIGINAL "INDESTRUCTIBLE" WATERPROOF SILK,

AND THE

NEW IMPROVED METAL CENTRED "ACME" LINES.

MORE than forty years have elapsed since the Eight-plait Waterproof Silk Line was first invented. Its use has become in the meantime almost universal. The success of the original waterproof line—as is the case with all genuine improvements—has been the signal for the launching of numerous, more or less unsatisfactory, imitations. In this instance they invariably fail on the score of durability. This, owing to the fact of their having been steeped in some deleterious mixture,* which, if it does not entirely rot the silk in a few months, will be owing to its having been rubbed or "spelched" from the line by the friction of the rings and the action of the water before that operation could be thoroughly effected.

The original waterproof dressing, first introduced by the late David Foster, in conjunction with the late Henry White, Professor of Chemistry, wears almost indefinitely, and since the principle of plaiting sixteen silk strands in lieu of half that number has been introduced, their wear-and-tear resisting qualities have been increased. To distinguish from the host of unreliable imitations, the original line is now termed the "Indestructible."

Our recent development of the above is the "Improved Sixteen-plait Double Dressed Acme," which line has a very fine gimp core, which is gilded to avoid all possibility of corrosion, and is in

* The prevailing practice is to boil the silk in a seething compound of oils, &c.

turn silk centred. By this means *just sufficient* metal is introduced into the line's centre, out of the way of all friction. It is used in an annealed state, and is simply unbreakable. So convinced are we, after some years' trial of the durability of the new line, that we supply on this unprecedented condition :—

Cash to be refunded or duplicate line supplied if line be not deemed satisfactory after twelve months' wear.

As the "Improved Acme" is equally adapted for fly, spinning, and bottom-fishing, the above condition of purchase is extended to all lines supplied for either sea or freshwater fishing.

A great advantage of the "Acme" is the ease with which a line can be got out. Being but little more than half the thickness of an old style line, though equally strong, it cuts through an opposing breeze and delivers the cast-off line with precision at long distances. The habitual user of a silk and hair line *especially*, will almost invariably cast many yards further with the "Acme," with extreme lightness and precision.

In spinning, and in fly, midwater, and bottom fishing, there is an absence of "curls" or "kinks," owing to the line being the requisite medium between stiffness and limpness.

On perusing the declared opinions of several of the leading living authorities, extracts from whose writings are appended, it will be observed that another chief point of superiority in the "Acme," in addition to the greatly increased casting powers that are extended to the user, is that of freedom from tangling, which hitherto has played havoc, at critical moments, with the fisherman's "time, temper, and tackle." These alone, it will be obvious to both tyro and proficient, are improvements as important as they are original. A practical trial, however, alone can convey an adequate notion of the full value of the improved line.

With this brief echo of the avowed opinions of the habitual users of the line described, we commend the "Improved Acme" to the attention of every individual interested in piscatorial pursuits.

D. & W. H. FOSTER.

CERTIFICATES.

The following testimony is printed as being typical of the general verdict :—

From "The Fishing Gazette" of August 28th, 1880.

THE NEW "ACME" LINES.

From a long article covering three-parts of a page we reprint the following :—

"Messrs. Foster, the well-known fishing tackle makers, have sent us one of their new 'Acme' lines; we have examined it carefully, and tried it with a rod, and are delighted with it. It is the line of lines for the fly-fisher. It is strong enough to kill the strongest trout that ever lived, and yet it is as fine as the very finest of fly-fishing could require; but strength and fineness are nothing new, and if these were its only merits, we should not feel justified in calling attention to it. It has another quality, however, which is quite new, and one which every fly-fisher will appreciate directly we mention it, and that is weight. Successful fly-fishing on most of our English streams depends greatly on the angler's powers to throw a long line in *any* direction, either with, or across, or most important of all, against the wind, or when there is none at all. To do this requires a strong wrist, and a thorough command of the rod. . . . How often have we, when wading up the side of a deep river, come to a place where, on account of projecting bushes, it was impossible to get past. The wind is blowing steadily down stream; a few yards above, and just away from the bushes, a good trout is feeding, the line is let out to the required length, a few casts across are made, and then, carefully, the upstream throw, in the direction of the desired spot is attempted; but the line falls short, the gossamer gut and fine reel line have no weight, and the wind steadily overcomes their forward impetus before they have fully extended, and they fall back limply on the water. The throw is repeated again and again; the tops of the wading stockings are dangerously near the edge of the water; as a last resource, more line is let out, more strength

In ordering, please quote List Nos. of articles required.

exerted, and at last, overcoming all resistance, the line falls with a splash right over the fish, and effectually finishes that chance of a rise which has been diminishing, if not already lost, by the previous thrashing.

“But our readers will say we are letting out too much line, and so we will wind up by describing how and why the ‘Acme’ line would have enabled us at the first attempt to get the line lightly over the trout. Twisted and interwoven with the plaited silk line is a very fine strand of copper wire, so that it almost needs a magnifying glass to see it. It is the addition of this wire, and principally the manner in which it is added to the line, which gives it a greater value in our eyes than any other line we have ever seen. . . Messrs. Foster are themselves thoroughly practical anglers, and we wish them every success in their endeavours to improve the angler’s weapons.”

From “The Fishing Gazette,” December 20th, 1884.

“Re the Improved ‘Acme’ Pike Line. We used a similar (though smaller) line the greater part of last fly-fishing season, and were very much pleased with it. We have had no opportunity of trying the pike line yet; but have no hesitation in saying it will be found thoroughly reliable in every way.”

From “The Fishing Gazette,” September 5th, 1885.

“Messrs. Foster Brothers regret their inability to be present at the Tournament on account of pressure of business; but they kindly send 120 yards of their splendid ‘Improved Acme’ trout line. We were using one of these last Saturday on the Darenth, one that has been in use over twelve months, and consider that it was chiefly owing to its good casting qualities that we got any fish, as there was a most unpleasant ‘fish tail’ gale blowing all day.”

From “The Fishing Gazette,” September 19th, 1885.

“Acme,” a writer in the above journal dating from Lough Conn, Ballina, says:—“With the fly I have used a ‘No. 0’ Acme line, both for grilse and trout, and shall in future use no other. For accuracy, facility for casting in wind, and for strength, I know no line to compare with them.”

In ordering, please quote List Nos. of articles required.

From "The Field," August 14th, 1880.

NEW FLY LINE,

"The Messrs. Foster have sent us a specimen of their new trout line; this is the sixteen plait silk dressed line, with a very fine annealed wire plaited through it. . . . We therefore gave the line a trial, and after an experience of several days' angling, we find that the freedom from tangling is fully sustained, and it becomes quite a relief to fish with. It is not appreciably heavier than any other line, while it throws very straight and true, and cuts well through the wind, capabilities which all anglers of any experience know well how to appreciate. Of its wear and tear qualities, of course, we cannot speak without experience, but we are informed they may be relied on. Altogether, so far as we have tried it, the line is certainly an improvement, and if it stands long use, it is a very great one."

From "The Field," August 16th, 1884.

"We have received from Messrs. Foster samples of the newest 'Acme' patent lines, which, as anglers who have used them well know, consist of fine copper wire ingeniously worked into the silk. The 'Acme' lines have been so long before the public, and their merits have been so proven, that it is not necessary to make any remark about the general article. Messrs. Foster, however, have introduced into the market sixteen plait waterproof dressed lines for both fly and spinning. These are of the 'Acme' description, and are, so far as we can judge from a casual trial, faultless."

After twelve months' use of above, the same writer (W. Senior, Esq., angling editor to journal last quoted), under date January 4th, 1886, writes: "I never had a better line than the new 'Acme' you sent me."

From "Land and Water," August 28th, 1880.

THE NEW "ACME" WIRE LINE.

"Mr. Foster is the inventor of several important improvements in fishing tackle, notably the eight-plaited waterproof fly lines,

In ordering, please quote List Nos. of articles required.

which have been in use for these thirty years ; the good qualities of which, doubtless, most of our readers are aware. From what we have seen of Mr. Foster's new invention, we have little doubt the new 'Acme' line will very shortly be in general use. . . . From our trials of the 'Acme' line it appears to possess great advantages over the ordinary lines. It is much easier to cast, for you can get it much further away, a fact which we satisfactorily proved when throwing against a pretty stiff wind. The line has a good spring, and, what is of great importance, is not given to tangle. One knows how vexatious this is with some lines. The 'Acme,' although it occupies much less space on the reel than the ordinary prepared silk lines, is nevertheless fully as strong."

From "Bell's Life."

THE NEW "ACME" FLY AND SPINNING LINES.

"The difference between the 'Acme' and other lines consists in the new notion of having a very fine strand of copper wire worked in the plait. This is done to obviate the nuisance of 'kinking,' as well as to give greater weight and power to the line when cast in the teeth of an opposing wind. . . . We have given it a good trial, and are bound to add that we are highly pleased with the easy, clean way in which a fairly heavy bait can be thrown. 'No. 00' should make a splendid line for Thames trout fishing. It is said to bear a dead strain of twelve pounds weight."

In a limited space it is impossible for us to print extracts from all the numerous reviews that have been given of the new line, by responsible angling editors. We reprint a few paragraphs which fairly sample the whole. The same statement applies also to the correspondence.

Amongst other leading journals the "Acme" line has been lengthily noticed by the *Austrian Sporting Times*, in an editorial of five columns; the *Illustrated Sporting and Dramatic News*; the *Austrian Sporting Times* (six columns); and by other English, American, and Continental notable authorities.

In ordering, please quote List Nos. of articles required.

The following are a few extracts from letters from our own correspondents, the originals of which can be seen on application ; also from recently published letters :—

“Thornford, Sherborne, Dorset,

“Gentlemen,

“September 22nd, 1885.

“In the early spring I purchased from you one of your ‘Acme’ trout lines. I have given the line a very severe trial on river and loch with fly, and even spinning. I have killed grilse and heavy loch trout, and once a pike over 10 lbs. on the line, and I am satisfied there are no lines yet made to equal them.

“Yours truly,

“ALEX. D. CLAY,

“Messrs. Foster.”

“MAJOR-GENERAL.

Extract from a letter published in the *Fishing Gazette*, March 30th, 1886 :—

“On another occasion I landed a salmon with one of the lightest makes. . . . The ‘Acme’ line will go straight from the rod in the teeth of a gale ; and as for wear—well, I’ll never, I believe, use any other now. I only wish these lines had been known to me long ago, as they are simply perfection. I prefer a line without any taper, and add a spliced taper gut cast between the line and casting-line. If the tackle-maker who supplies a line is a practical fisherman, and knows the strength of your rod, he will easily give a proper weight of line to balance the rod. You will never throw a bulky, heavy line with a supple rod, nor a light line with a stiff rod. The ‘Acme’ supplies a decided want—weight and fineness combined, and a light rod can be used with them.

“I am, &c.,

“Bohally, Pitlochry.”

“JAMES MACNEE.

“21, South Sutton Place, Cardiff.

“The ‘Acme Line’ I find as good as I was led to suppose it would be. There is no difficulty *now* in getting a straight line on the water.

“April 22, 1883.”

“W. H. BURROW.

"The Lower School, Uppingham,

"March 23rd, 1885.

"The 'Acme Lines' I have had from you please me very much, and also others to whom I have recommended them.

"(The Rev.) W. VALE BAGSHAW."

"6, Mansfield Street,

"Portland Place, London, W.

"Please send me some patterns of your 'Acme Lines.' I bought two from you some years ago, and they answered remarkably well.

"EDWARD COLEGRAVE.

"10th June, 1885."

"Llwyngwern, Tantperthog, R.S.O.,

"Merionethshire.

"You are right in thinking the line sent last year was No. 1. I have the line now, and it is as good as new. The line, however, is a little too strong for my lightest rod. I therefore want you to kindly send me one a size smaller.

"W. J. MORRIS

"4th June, 1885."

"(COLONEL)."

"Ivy Cottage, Knutsford.

"Mr. Buxton wishes Messrs. Foster to inform him if he can obtain another line of the same dressing as enclosed sample, which was waterproofed by the late Mr. Foster's process in 1865. On this something like 1,500 salmon have been killed. 100 yards length is wanted, precise to pattern.

"March 16th, 1887."

In ordering, please quote List Nos. of articles required.

39, Vyse Street, Birmingham.

"Dear Sirs,

"I have personally given the centre wire line three good trials, and am pleased to advise you I consider them in every respect the best I ever tried. In spinning I could throw any requisite distance without the nuisance of the line snarling. In point of strength the centre wire 'Acme' is equal to landing the strongest pike that ever broke gimp. I consider your lines the best in the market.

"Yours very sincerely,

"JAMES GREGORY."

(PRESIDENT OF THE MIDLAND PISCATORIAL ASSOCIATION.)

(*Extract.*)

October 13th, 1885.

"The 'Acme Line' works splendidly. I only wish I had tried one before.

"E. GOSLING."

(*Extract.*)

"Trelaske, Launceston, Cornwall,

"February 26th, 1884.

"I like the 'Acme' line I had from you last year better every day.

"CHAS. ARCHER."

"2, Priory Buildings, Cheltenham,

"February 20th, 1885.

"Please send per return (as I start for the States about Monday next) 100 yards No. 3 Metal Centre 'Acme Line,' I want it for pike; also send 30 yards of fine trout size to *match* enclosed scrap. This is off one of your lines which I bought from you some two years ago. It is still in good order, and has given me every satisfaction.

"Yours truly,

"L. Q. KERMODE."

In ordering, please quote List Nos. of articles required.

"Kinder Bank, Hayfield, near Stockport,

"November 17th, 1885.

"Dear Sirs,

"*Re* your 'Acme Line,' it is, indeed, all that can be required. I thought I could throw a line as well and as clean as most people before, but I was certainly surprised at myself with the 'Acme.' I was fishing mostly against the wind when I found it invaluable. Another property I found was that, in casting *across* a stream to the other side, the line appeared to *cut* the stream and to allow the cast of flies to float, instead of, as usual, the water pulling the line at once, and consequently dragging the flies with it. I shall never fish with any other line.

"Yours truly,

"Messrs. Foster Bros."

"WM. P. GIBB.

"Haughton-le-Skerne,

"July 9th, 1884.

"I was lately trying your 'Acme Line' against an ordinary hair and silk line, and found that the result was greatly in favour of the 'Acme.' I made the trial on a gravel walk, and found that with the 'Acme' I could throw much straighter and much further with a shorter length of line out.

"THOS. R. SUMMERSON."

"Staplestown House, Carlow,

"January 18th, 1887.

"I shall shortly be getting some more of your beautiful line. I have for years been in search of a good spinning line, and though I tried all the most expensive kinds, none of them stood a month's work. Yours, after all last season, is as good as ever, and will begin again this day fortnight, weather permitting. Mr. G. Fishbourne is quite as well pleased with his.

"FRANCIS FISHBOURNE."

In ordering, please quote List Nos. of articles required.

"Inland Revenue, Cockermouth,

"November 19th, 1886.

"I may add that your salmon and trout lines in use in this neighbourhood have had an exhaustive trial, and they are the objects of envy and admiration to the less fortunate fishermen."

[Later letter.]

"January 8th, 1887.

"To praise your lines is superfluous.

"F. WILSON."

"Fernleigh, Red Hill, Surrey,

"June 21st, 1886.

"I think no line throws so straight or runs so easily through the rings as yours.

"G. E. SPECKENWELL."

"Douro House, Wellington Road,

"Edgbaston, Birmingham,

"October 29th, 1886.

"Be good enough to send me seventy or eighty yards of 'Acme Line' for pike fishing on receipt of this, as I wish to use it on Monday. The lines I had from you some three years ago I have found very satisfactory.

"FRED. J. LESLIE."

"The Canadian Senate, Ottawa, Ontario,

"August 2nd, 1886.

"I have used your 'Acme Lines' since 1882, getting them from S. Maltby, of Montreal. They are certainly the best I know of for salmon and trout fly-fishing, and unequalled for casting in a heavy wind. The dressing takes a fine polish (this is the strong point of the American enamelled lines), and wears to the

very last. This season they have met with great approval from some American gentlemen fishing with me. Maltby's stock usually consists of but a few lines all of one size. I cannot now get the sizes I want, and do not know how the numbers run. Moreover, I am curious to see your improvements. I should be much obliged if you would send me samples.

"J. G. AYLWIN CREIGHTON."

[Later letter.]

"October 12th, 1886.

"I am much obliged for the catalogues and samples of 'Acme Line' you sent. Some friends to whom I have shown the latter, and who saw the capital working of the 'Acme Lines' I had in use, are so much pleased that they join in my order. Will you be good enough to send me by parcel post 640 yards in sizes . . . Cheque enclosed.

"J. G. AYLWIN CREIGHTON."

"59, Mark Lane, London, S.E.,"

"August 26th, 1886.

"I am still using the 'Acme Line' you sent me two or three years since, and it is almost as good as when new.

"J. I. P. PECHEY."

"Chester Villa, Chertsey Road,

"Clifton, Bristol,

"July 15.

"The 'Acme Line,' No. 00, I got from you a short time ago has proved to be very good. I have caught over 200 fish with it, some large ones, and it is as good as ever.

"GEORGE A. CUYLER

"(COLONEL)."

" 120, Beaufort Street,

" South Kensington, S.W.,

" April 5th, 1886.

" I consider your 'Acme Lines' with wire centre to be very far the best I have ever used. I gave one some very hard work last season, both in fresh and brakish water, and it is now as good as ever. As soon as I return to Devonshire I shall give you an order for another rather stouter, for using with a stiff rod in throwing against the wind. You can make what use you like of this letter.

" E. GOSLING."

" Mill House, Cumberland Road, Bristol,

" October 7th, 1886.

" Some time ago I had one of your trout 'Acme Lines,' I think No. 0, as you will see by sample enclosed. It has been the very best line I ever used, in fact quite a treat to use after the samples one gets nowadays. For it is only by chance a good line is very occasionally met with.

" FRANK ROBBINS."

" 4, Lennon Street, Edinburgh,

" October 23rd, 1884.

" The line is perfect.

" GENERAL R. WARDEN."

" Roslin Road, Crookesmoor, Sheffield,

" May 6th, 1884.

" I have thoroughly tried the line you sent me, and I must say it is really extremely good.

" H. BARBER."

In ordering, please quote List Nos. of articles required.

"Ystradwrallt, Nantcaredig, R.S.O.,

"Carmarthenshire,

"November 23rd, 1886.

"I am very pleased indeed with the 'Acme Salmon Line' I had of you this summer, and feel sure a better kind of line could not be used.

"ANTONY W. J. STOKES."

"Knap Hill,

"October 16th, 1886.

"The line I had from you ('Acme,' No. o) answered very well ; it is a pleasure to cast a fly with it.

"J. W. ASHHAM."

"Barle Cottage, Dulverton, Somerset,

"16th March, 1886.

"The 'Acme' reel line obtained from you this time last year is as good, if not better, than ever, perfectly smooth and sound ; I would use no other. Brother fishermen, to whom I have shown and recommended it, say it has no equal in England or the States.

"B. C. MARSHALL, JUN."

An extract from "The Trout and How to Catch it." Published during 1885 in "The Boy's Own Paper."

"The 'Acme' metallic centre line made by the Messrs. Foster, I believe to be the best line in the market. It is not clumsy as regards size, nor is it too light. The pressure of the fine gimp in the core gives it increased facility for casting, which makes it a very pleasant and easy line to fish with. By all means get an 'Acme' in preference to a cheap and unreliable imitation.

"J. HARRINGTON KEENE."

(Author of the "Practical Fisherman," "Fishing Tackle and How to Make it," &c.)

Extract from "Trout Fishing," by Thomas Ford. This little work can be supplied post free at the publisher's price, viz., 1s.

"I have recently had an opportunity of testing the new 'Acme' line brought out by the Messrs. Foster. This line unites weight, strength, and durability. To the fly fisher it will be simply invaluable, and must inevitably supersede the use of hair lines, which so soon become untrustworthy. Of course such an article is a little dearer at the outset, but it will in the long run more than compensate by the extra properties it possesses."

Extract from unsolicited testimonial from R. B. Marston, Esq., Editor "Fishing Gazette."

"London, May 5th, 1885.

"I have used the 'New Improved Acme Line' last season and this, and find it a vast improvement on the 'Acme Line' as first brought out by you. You have got hold of an **A1** line, and an **A1** dressing for it."

Letter published in the "Fishing Gazette" from the Editor of the "Field."

"March 27th, 1886.

"Sir,

"The fault, no doubt, is mine, for not amplifying my explanation, when, as our good friend Mr. Cholmondeley Pennell in his interesting article in the *Fishing Gazette* of Saturday says, I gave him my experience of lines through which wire was passed. That experience was solely with reference to wire spirally twisted. An American line I have in especial remembrance at this moment—green, with bronze spiral wire—which was a fraud from beginning to end. My experience of the lines with a wire centre is quite another thing, and it is confined to the 'Acme' of Messrs. D. & W. H. Foster. On receiving sample lengths in their trade circular I put the ends under a strong magnifying glass, and they

In ordering, please quote List Nos. of articles required.

looked so much like business that I ordered a line that will do for light salmon or pike spinning (No. 1), and another for trout fishing (No. 00). This was two seasons ago. I have used both lines hard ever since, and they appear to be quite good for the chances of 1886. They are, in short, the best lines I ever had. I feel bound to trouble you with this friendly correction.

“W. SENIOR.”

NON-METALLIC SILK PLAIT LINES.

The following facts, the result of an experience of over forty years, enables us to guarantee the "Indestructible" to be the most durable and reliable dressed line produced. It is the original Waterproofed line; and were it not transcendently superior in every way to its numerous more or less unreliable imitations, silk-dressed lines would long ere this have been discredited and discarded by practical men everywhere.

It is dressed to the core.

The waterproof dressing always adheres to the line (which thus never needs redressing), and is found to wear smooth with hard wear and friction. The preparation gives just exactly the medium grade of limpness required. The line is thus left the needful weight without stiffness, and is strengthened and protected to resist the action of the continuous friction of the rod rings, and that of the water, for an indefinite length of time. These lines are almost invariably used until they become too short (by knot-making, &c.,) for further service.

Both in price, quality, and sterling value for cash, the original Indestructible is found to be much superior to any and every other make—which for the most part are surface-dressed only—without a single exception.

The following sample certificates are by no means isolated ones. Such have been constantly—for the past 35 years—and *are* being, in increased numbers, received by us:—

"The Lower School,
"Uppingham.

"Dear Sirs,

'I shall be much obliged if you will send to me, at the above address, by return of post, two of your excellent 'Waterproof Silk Lines.' I have had one in use for ten or twelve years, and have found them exceedingly good.

"Yours very truly,
"REV. W. VALE BAGSHAW."

"Arbuthnott House,
"Fordoun, N.B.

"Sirs,

"Enclosed is a bit of salmon silk line, which I got from you very many years since, and which is in every respect the best I ever had. The line has done a deal of hard work, and is now quite used up, there being only about 40 yards left. Be so good as to send me another of exactly the same *weight* and *make*, and let me know the price, and a P.O.O. shall be sent by return of post.

"Yours obediently,
"To Mr. Foster."
"ARBUTHNOTT.
(Viscount).

"Sirs,

"I have got the line all right, and send enclosed a P.O.O. for the same. It is, as you say, not the exact size of the sample. When you are making your lines, pray keep one for me *exactly the same in every way as the old*, for it is certainly the very best I ever had ; in fact, quite perfect in every way, and allowed to be so by many good judges.

"Yours faithfully,
"ARBUTHNOTT."

"Clifton, Ashbourne.

"Dear Sir,

"Please send me a new line to enclosed sample, which is part of a line I have used for near upon 30 years now. It is one of your 'Indestructible' Silk Waterproof Lines, which are undoubtedly far away superior to any other lines sold.

"THOS. WM. SMITH."

In ordering, please quote List Nos. of articles required.

“Denstone, Uttoxeter, Staffs.

“Dear Sirs,

“Please post to me one dozen more of your ‘Indestructible’ Silk Waterproof Lines. I have been a fishing tackle maker for a very long period, and also a practical fly-fisher for between 60 and 70 years. During that time I have had opportunities of testing lines for fly-fishing made by the best makers, but I have never met with any so good and durable, and so pleasant to use, as the above, as they never curb or twist when thrown out or drawn up, though ever so rapidly, through the rings of the rod; they, moreover, cast very straight and neat on the water, and vary but little in point of weight, either in or out of the water, which is a decided advantage over silk and hair lines, either twisted or plaited, both being apt to recoil, twist, and curl until *thoroughly wet*. Your lines have always given my patrons the greatest satisfaction, and I with confidence feel a pleasure in recommending them, and

“I remain, yours most sincerely,

“SAMUEL HEMING.”

EXTRACTS FROM LETTERS AND FROM ARTICLES APPEARING IN
LEADING SPORTING JOURNALS, ANENT THE
"GOSSAMER SILK LINES."

" 54, Donnisthorpe Street,
" West Bowling, Bradford,

" Gentlemen, " July 12th, 1885.

" Please send me half-dozen more ' Gossamer ' Lines per next post (50 yards) ; my customers find these the finest and best lines they have yet used for live bait, and for roach fishing, &c., &c. They are less liable to suffer from heavy and constant use than the more loosely plaited, and consequently less compact ordinary fine lines.

" Yours, &c.,
" J. W. SAGAR."

" Dear Sirs, " Newport Road,
" Moseley, Worcestershire.

" The lines I have had from you have given me every satisfaction ; pray send me more samples for my friends, who are anxious to get similar. Both the ' Indestructible ' and the finer lines are much liked by all who have seen and tried them.

" Yours faithfully,
" HENRY EDWARDS.

Mr. J. P. Wheeldon, Angling Editor of " Bell's Life," says:—

" They are the best live bait lines I have yet seen. I can strongly recommend the ' Gossamer ' make, which is both finer and stronger than the best we have hitherto seen."

" Chub Chavender," in a leader in the " Fishing Gazette," says:—

" But if you wish to use the best line, I believe, ever made, procure one of Foster's ' Gossamers.' I am not saying this to puff Messrs. Foster, but merely giving the result of my trials and experiments of various lines for the finest and best modes of angling for roach, barbel, &c., now in the market. This, as I have stated, is in favour of the 16-plait ' Gossamer ' line."

In ordering, please quote List Nos. of articles required.

RANGE OF REELS.

Best Bronzed Outside Pillar Reels. These reels are the lightest metal reels made. They will hold more line, for size, than any other side-fitting winch. The bobbin, or line holder, coming to the extreme edge of the side plates of the reel, every atom of space is utilized.

Best Quality Solid Reel Plate, steel internal fittings ; revolving plate.

If with double rollers for line to run between, as in illustration,
4s. 6d. extra.

If nickel plated 2s. 6d. extra.

Best Bronzed Composite Reels, constructed in part of ebonite, and partly of bronzed brass.

These reels are excessively light ; they are also durable and strong ; they will stand a heavy fall without danger of being knocked “out of true,” which is more than can be said of the usual run of ebonite reels ; the superiority is in the material used, as well as in the workmanship.

THE NEW CENTRE FITTING WINCH.

REGISTERED.

*Compensating balance, centre fitting, detachable by spring action.*

Some five years have now elapsed since the original of the above design of reel appeared, during which time, mainly by its merits (since until the last few months or so we have not advertised it, other than placing same in our own lists, &c.), it has gradually gained favour. All who use it like it, and recommend its use to their friends, hence its growing popularity. There are so many advantages entailed in the adoption of the centre winch, that, given they are once grasped by the uninitiated, its ultimate universal adoption is sure. Habitual users aver that the climax of perfection has been reached, *re* reels, in the above. Being "skeletoned," they are *lighter* than any metal side fitting winch hitherto introduced. A few of the advantages entailed by its use are these:—

I.—The strain upon the fly rod is by its use no longer given in one direction. The winch being in the centre, the rod may be used rings uppermost, or *vice versa*, at the owner's discretion.

In ordering, please quote List Nos. of articles required.

2.—The position of the reel at the extremity of the butt gives an additional 9 to 12 inches swing power and length to the rod, serving also to happily *balance* and effectually harmonise the two detachable implements.

3.—The winch being devoid of cross bars, indispensable in the old reels, is rendered capable of holding a much greater length of line. Thus a 2 inch (dia.) reel will answer the Trout fisher's purpose, it being capable of working easily a 35 yards length of strong waterproof line.

4.—No obstacle is given to the free working of the line. Fishing from hand or reel may thus be practised without the possibility of entanglement and loss, as in the existing side fitting plan.

5.—It is more portable, and works better with the rod than anything hitherto introduced.

They are thus found to be superior on every important point.

“Foster’s flies are equal to any we have ever seen, beautifully made, and tied on the finest gut. Their ‘Duns’ are particularly good.”—*Fishing Gazette*, May 29th, 1880.

LIST OF TROUT AND GRAYLING FLIES.

(COPYRIGHT.)

Dressed from instructions given in the “Scientific Angler,” by the late David Foster.

The appended list of “naturals” are to be found upon all trout and grayling streams, wherever situated, the only diversity being in point of *size*. They make their appearance at the exact period stated, excepting when the seasons are extremely irregular, in which case no fixed rule could possibly be accurate.

We dress the whole of this selected list of “standard killers” *true* in point of colour, size, and attitude, to the most minute particular for each locality and river. One or two fancy flies are added to complete the list of standard flies. The flies marked thus * are dressed both light and dark.

MARCH.—No. 1, Red Fly; No. 2, Blue Dun: No. 3, Cockwinged Dun; No. 4, March Brown; * No. 5, Cowdung Fly; No. 6, Bumble.*

For the allurements of trout and grayling in February, the Red Fly (or Old Joe) and Blue Dun are the most killing flies that can be used, but on excessively cloudy and cold days the grayling rise best at the light Bumble* and Cockwing. The March Brown comes upon our midland streams about the third week in March; it kills so well in this and the adjoining counties, that it is designated the *Dun Drake*.

“Fosters tie magnificent Flies.”—From leading angling article in *Field*, January 24th, 1880.

"We can strongly recommend Foster's Red Caterpillar. He has frequently afforded his customers great success with it."—*Country*.

APRIL.—No. 1, Yellow Dun ; * No. 2, Pale Blue Dun ; No. 3, Sand Fly ; No. 4, Grannum ; No. 5, Foster's Intermediate ; * No. 6, Iron Blue Dun.*

The Yellow Dun of April makes its appearance in great numbers on cloudy and cold days from April to September. We have found this fly the most deadly "artificial" we ever threw. The legs are that beautiful oliv-yellow shade so difficult to imitate ; the body is of a smoky-blue colour, through which the lemon-tinted ribs protrude from head to tail, and the wings are of the ordinary dun transparent hue. This fly will appear much darker in colour when the season is backward and cold. In this emergency we use a copy darkened by introducing a rust-like shade upon the body, which has a good effect when held between the eye and the light. The fly marked as our *Intermediate* is intended to represent the middle or intermediate stage of all the "duns" whilst in the act of changing their skins, prior to their reappearance as *Spinners*. The Pale Blue, Sand Fly, and Green-tail, or Grannum, are all good flies, both in spring and autumn. The Iron Blue makes its first appearance in this month, but is much more numerous in that following.

MAY.—No. 1, Yellow Dun ; No. 2, Black Gnat ; No. 3, Little Yellow May Dun ; No. 4, Oak Fly ; No. 5, Yellow Sally ; No. 6, Mulberry Bumble.

The Yellow Dun of May kills well on fine warm days, and is much smaller and lighter than that of April. These, in common with all spring flies, kill well at times in the autumn, the weather and water then being about the same temperature. The black gnat is a very small fly, which is a great favourite with both trout and grayling when fully on the water. The usual copies of these little creatures are, generally speaking, much nearer the size of a blue-bottle than that of a gnat. The same observation also applies to the Iron Blue, Red Ant, and Little Chap ;

"Mr. D. Foster was undoubtedly one of the most successful fly-fishers in England."—*Sporting Life*.

In ordering please quote List Nos. of articles required.

"As we pointed out in our sketch of 'Famous Fishermen,' last week, the Messrs. Foster are unrivalled in the art of fly-making.—*Fishing Gazette*, June 28th, 1878.

the former, as we before observed, is very plentiful in May, when it assumes a lighter shade on the body. The fish are remarkably fond of this sturdy little ephemeral, especially when it appears in its new dress as the Jenny Spinner (which it does on the second or third day of its existence). In this last stage it lives some four or five days. The Oak Fly and Yellow Sally are in season from May to July.

JUNE.—No. 1, Little Dark Spinner; No. 2, Turkey Brown;* No. 3, Red Palmer Caterpillar; No. 4, Little Chap; No. 5, Common Yellow Dun; No. 6, Golden Palmer.

The Red Haired Caterpillar, or "Woolly Bear," as it is called, is strongly recommended for trout when the fish are not rising, or when they are merely playing and not feeding. This insect is very abundant throughout the whole season. It is the caterpillar of our common *Arctia Caga*, or tiger moth, found amongst shrubs, &c., lining the banks of the streams, from whence it drops into the water and becomes food for fish. The length and bulk of the body enables the artiste to place two hooks in the artificial, which greatly lessens the chance of losing a fish when hooked. Under the brightest sun, and in the clearest water—no matter if the rays of the former cause the latter to glisten like molten silver—we have found this lure to be *par excellence* when affixed to the point of a fine lash, cast, and allowed to sink a few feet above the haunt of a heavy fish who is dosing away the weary hours as they drag along towards twilight. It speedily attracts attention, and after an "all round inspection" by Master Speckle, a couple of reeking jaws open and close upon both "feather and fur," and the monster leisurely turns down; his progress is however arrested by the point of one or more sturdy hooks, which are now firmly fixed in the corner of his mouth—a most important point in favour of the rodster prior to the customary struggle. The Dark Spinner, Common Yellow, and Golden Palmer, are generally useful from May to September. The Turkey Brown kills when

"Foster's Grayling Flies are charmingly made. The workmanship is faultless."—*Field*, Sept., 1885.

In ordering, please quote List Nos. of articles required.

"Foster's Bumbles" we have referred to often before as being among the best flies it is possible to use for grayling or trout in the midland streams."—*Fishing Gazette*, Sept., 1885.

the water is discoloured. The light copy is an excellent fly on a summer's evening, towards dusk, when it is taken for the small light grass moth. The Little Chap is an excellent fly for grayling and trout on all fine clear days during the summer.

JULY.—No. 1, Pale Evening White; No. 2, Pale Evening Dun; No. 3, July Dun; No. 4, Honey Dun Bumble; * No. 5, Red Ant; No. 6, General Black.

The Pale Evening Whites and Duns are very abundant through the whole of this month. They may be observed in clouds, together with the Red and Golden Spinners, Yellow Sally, &c., about bridges, weirs, &c., after sunset, when both aerial and terrestrial fly-catchers have a fine time of it. The July Dun, Red Ant, and Dotterel, may be used at mid-day, when the fish are on the feed. The General Black is a very useful fly, as it effectually represents the whole tribe of blacks. It is an especial favourite in Derbyshire, Staffordshire, and the North.

AUGUST.—No. 1, Whistler Fly; * No. 2, Golden Dun; No. 3, August Dun; No. 4, Cinnamon Fly; No. 5, Golden Dun Midge; No. 6, Orange Dun.

The Whistler is a most excellent fly for discoloured water. We have killed enormous baskets of fish with this fly when the water has been deemed too muddy for worm fishing. The Golden Dun is almost invariably a good killer on bright clear days. The August Dun comes on the water at eleven and stays until four o'clock. The late Fœtid Brown or Cinnamon is very good on cold windy days, when it is often very numerous about the stones lining the river side. The Golden Dun Midge and Orange Duns are good throughout the whole season.

SEPTEMBER.—No. 1, Whirling Blue Dun; No. 2, Primrose Dun; No. 3, Little Pale Blue; No. 4, Willow Fly; * No. 5, Blue-Bottle; No. 6, Red Spinner.

The Whirling Blue is a well-known fly for autumn fishing. It is much appreciated by the fish, especially on cold days, and under these

"Foster's Flies are always well tied."—*Sportsman*.

In ordering, please quote List Nos. of articles required.

“The Bumbles dressed by the Messrs. Foster are unequalled by any we have yet seen for neatness and for use amongst grayling.”—*Fishing Gazette*, 1882.

circumstances it follows, as a natural consequence, that the fly ranks high also from the fisherman's point of view. The Red Spinner kills well towards twilight, from April to September, after fine days. All the Duns that live to maturity become *Spinners*; these latter are therefore, and in consequence, very numerous. The usual copies of these truly beautiful insects are, for the most part, very indifferent, both as regards colour and attitude. The natural flies are taken by the fish whilst in the act of laying their eggs, one of which they drop each time they alight upon the surface of the water. That these, the most “prim, pretty, and plentiful” of the whole category of winged insects, should be neatly and skilfully copied in every detail will be readily conceded by all who have ever devoted any attention to the subject. The Little Pale Blue and Willow are great favourites with the grayling during this the best month for these delicate fish.

OCTOBER.—No. 1, Hare's Ear Dun; No. 2, Needle Fly;* No. 3, Grey Palmer; No. 4, Esterhazy Dun;* No. 5, Coch-y-bondu; No. 6, October Dun.*

The Hare's Ear is an excellent fly from early spring to autumn. The Needle Fly and Grey Palmer are the best grayling flies that can be used. The Coch-y-bondu is a most excellent fly for brook fishing for large trout, and for heavy waters generally. The Esterhazys and Octobers are among the most prominent of the myriads of Little Duns that haunt both river and brook for the remaining portion of the season.

It will be seen that a list of forty-eight kinds of flies are given, these being arranged for the year. This list is a medium between the two extremes drawn by Pennell and Stewart, on the one hand, with Wade, Theakstone, and more writers of the old school on the other. The contrast shown in the advocacy of three solitary commonplace hackled lures, and the other stretched extreme of over three hundred, is

“Mrs. M. Smith and Mr. David Foster, Ashbourne, are referred to by the editor of the magnificent work before us (‘A Quaint Treatise on Flies and Fly Making’) as being the most accomplished fly-makers of the day. We can endorse the statement.”—*Field*, May, 1876.

In ordering, please quote List Nos. of articles required.

"The imitations are wonderfully exact."—*The Nation*, New York, U.S.A.

too overdrawn to gain the allegiance of experienced and unbiased judges.

Naturalists and entomologists of note agree there are upwards of three hundred varieties of aquatic insects, but the vast majority of these, it is also affirmed, are rarely, if ever, touched by the fish, whose preference is, as a rule, given enthusiastically to those flies *most numerous* at any time through the season. Thus the Little Black Smut, or Angler's Plague, as it is occasionally called, when heavily plentiful, will wholly monopolise the attention of the rising fish, though other and larger insects may be "on." The grounds or reasons for taking a list of six flies seasonable for each fishable month, are based on an extended study of the habits of both fish and prey. They are incontestably logical, and sound practically, being found to succeed upon the well-flogged streams of the midlands, and the clear, slowly flowing waters of the south. The plan and principle cannot but extend with rolling time to more remote, and, consequently, less whipped waters of the north and west. In proof of the statement here advanced, it is only needful to remind the reader of an acknowledged fact, endorsed readily by the highest authorities on English trout and grayling fishing, viz. :—*That the southern regimen is fully successful in the north*, whilst the infallible trio of hackles or spiders are found of *no practical use whatever south of the border counties*.

In this progressive age results are consulted more and more. Theory is more quickly discountenanced, whilst stern practical tests are eagerly sought and acted upon, hence the advance of science, and the consequent diminution of misleading fallacy and error. That the convenience of being confined to a universal cast of flies is illusionary when *sophisticated* fish are one's object, goes without saying. Equally rational is the inference that if *convenience* is the one and only object to be considered, it will at all times be far more readily attained under any circumstances and conditions by reproductions of flies fed upon by the fish, rather than by a something like nothing between earth and sky. We instance the

"We find Foster's eyed flies to be very good ; they are admirably dressed."—*Fishing Gazette*, Sept. 25th, 1886.

March Brown,
Olive Dun, and
Iron Blue.

These three flies are *natural* favourites with the fish, and creditable copies cannot fail to kill anywhere better than others having no counterparts in nature.

For grayling the

Needle Fly,
Grey Palmer, and
October Dun,

are the best all-round killers. The habitual scarcity of surface food in the late autumn months renders the hosts of fancy flies more useful ; hence the reputation of the Bumbles, and the ever-growing varieties of tinselled and tagged "flies." These, *when no fish are seen to rise*, are to be often used with effect.

The best and wisest course, we would emphasise and repeat by way of conclusion, is that of plying the flies upon which the fish are feeding, and that are seen prevalent at any time. Cotton defined and enhanced the usefulness of a fly list by portioning it to the months and season, each fly so portioned being supposed to bear some resemblance to living insects found at the period named, and forming food for fish ; so did Ronalds and his immediate copyists, and so, lastly, did the author of the new standard work on angling, viz., the "Scientific Angler." Aquatic naturalists, in short, are unanimous on this all-important point and conclusion, "that no other principle can possibly succeed so well under the conditions present on well-whipped waters, wherever situate, than that of presenting imitations of flies 'on' whilst fishing at any given time."

"The best floating drake that I know of is one tied by Fosters, of Ashbourne—Canadian wood-duck wings, with hollow wheaten straw body."—*Sporting and Dramatic News*, June 5th, 1886.

CERTIFICATES.

"Foster's flies, in my humble opinion, are second to none, if not superior in many respects to any."—Writer in *Bell's Life*, Oct. 27, 1883.

"Their trout flies are extremely well dressed, whilst those tied for salmon and sea trout are among the most tasteful we have seen."—*Field*, Aug., 1881.

"Foster Bros.' Flies, in our opinion (and that of most of our angling friends) are unequalled."—Writer in *Field*, Oct. 27, 1883.

"FOSTER'S BUMBLES.—Messrs. D. and W. Foster, of Ashbourne, Derbyshire, whose celebrated bumbles have been so often referred to by us as being among the best flies it is possible to use for grayling or trout, send us samples of still finer tied varieties. The sight of a 'honey dun bumble' always reminds us of many a good trout and grayling killed with it. Then we have the 'mulberry bumble,' a standard favourite of ours, which is a capital little fly. We have never done so much with the 'light' and 'rough' bumbles as with the 'honey' and 'mulberry,' though they are both good flies for the last hour's fishing, when something a little more showy is wanted. The 'furnace bumble,' is an indispensable fly in a cast of bumbles, and will kill all the year round. Gut is beautifully fine."—*Fishing Gazette*, Sept. 13, 1883.

"We like their flies dressed with upright wings, full feathered, for dry fly fishing."—Leader in *Fishing Gazette*, Sept. 15, 1883.

"The bumbles and Derbyshire duns kill well upon the Yore and Wharfe; especially is this the case with the splendid series of bumbles and upwinged duns manufactured by Messrs. Foster Bros., of Ashbourne."—Francis M. Walbram, in the *Fishing Gazette*, Oct. 28, 1883.

"We opened with an admirable example of Foster's, of Ashbourne. I never landed, in a shorter time, seventeen brace of more beautiful trout. My friend, who is a tyro at the art, came under a fourth of my take, but he was perfectly satisfied. Foster's May fly (Green Drake) will please anybody. It is not a large pattern, but with a well covered body, and for an hour, at least, when my friend could not stir a fish with

In ordering, please quote List Nos. of articles required.

a finer bodied fly, I took them out all round him."—F. S. Perkin, *Fishing Gazette*, Sept. 6th, 1884.

"Should he not kill fish with them, he may rest assured that the fault lies with himself in some way or other, which remark also applies to the splendid series of bumbles and up-winged duns manufactured by Messrs. Foster Bros. of Ashbourne.—*Fishing Gazette*, Oct. 20, 1883.

"I put on a stout collar and a big two-hooked construction, invented by old David Foster, and known to Derbyshire anglers as the Woolly Bear. I ought to have used it in the middle of the day, but overlooked this. I took several brace of fine fish with it in a short space of time."—*Field*, Sept. 16, 1884.

"The late David Foster was the father of the firm. He was a fine old angler, and famed far and wide for his skill in fly tying; and Mr. Aldam, editor of the 'Quaint Treatise on Flies and Fly Making,' referred to him as one of the most accomplished fly makers of the day. The duns and bumbles made by old David's successors are still amongst the most beautiful of manufactured specimens."—*Field*, May, 1885.

"I see that Mr. F. N. Halford, who has just published 'Floating Flies, and how to dress them,' quotes from, and approves of, Mr. Foster's theories as to water flies. Even the well-known angler, Mr. T. E. Pritt, says in his excellent book, 'Yorkshire Flies'—'A trout will sometimes take any fly that is presented to him, but it is as well to remember that, in nine cases out of ten, he will not look at anything but the fly which is on the water so long as the rise is on.' This is quite correct, and as a winged imitation can be made to resemble the natural insect better than a hackle fly can, Mr. Pritt's argument may be said to be in favour of Mr. Foster's recommendations."—*Preston Guardian*, April, 1886.

"The late David Foster, of Ashbourne, was, I believe, the first to originate the plan of dressing flies similar to the above-named, with wings, which would retain an almost upright position when wet, or subjected to heavy usage, and his method, as explained in his eminently practical work, *The Scientific Angler*, is as follows:—" (here a lengthy quotation is given, which it is not needful to repeat).—From "British Angling Flies," by Michael Theakston (new edition).

See also Adam's "Flies and Fly Making"; "Floating Flies," by F. M. Halford; "Fishing with the Fly," by A. Nelson Cheney; "Modern Improved Tackle," by C. Pennell; and other leading authorities.

The unsolicited communications following may be perused in the original writings on application:—

[Extract.]

"Tyndwfr, Llangollen, North Wales,

"March 23, 1884.

"Please send me a dozen cock winged duns (March and October shade) similar to the half-dozen I had from you. They are A1. The water here is getting fine, and, as I expected, the merits of your accuracy of colours and perfect material are becoming manifest.

"G. H. DICKIN."

[From Later Letter.]

"October 29, 1886.

"The flies are exquisitely tied, and though the quill gnats were not ordered, I have decided to keep them, as they are so good.

"G. H. DICKIN."

"Stansfield Cottage, Littleborough, near Manchester,

"August 4th, 1884.

"Will you please forward, per early post, Flies, as other side. I have tried flies by many other makers, but find none equal to yours.

"JOHN HEAP."

"Thornton-in-Craven, Leeds,

"April 7th, 1884.

"I find your flies to be splendid killers, especially the duns.

"ED. BOND."

"Ashover, Chesterfield, March 27, 1884.

"Last April Mr. Whitmore found Messrs. Foster's 'Intermediate' kill wonderfully. The fish would not some days look at duns or bumbles, but took the 'Intermediate' freely."

In ordering, please quote List Nos. of articles required.

From Dr. Robert Ellis.

"The Raven Spring, Mitcham, Surrey,

"June 22nd, 1883.

"Sirs,

"What have I been doing? Before what idols of stock and stone have I bowed my neck and lowly head? Why did I not hear of you, or, rather, *give ear* to you, all this time of angling darkness which has beclouded my common-sense of the fitness (and unfitness) of things piscatorial?

"Listen! I, accompanied by the acknowledged Chief of the Fly—(shall I pun in my penitence?)—the Fly-men of North Devon, went a long day's flying (more bad puns) down and up the private streams kindly opened for me by a noble Earl. And I came back almost as I set forth—my creel almost empty; and I, savage of temper, morose, and utterly downcast. It didn't matter, down-cast or up-cast, on the stream—no luck at all.

"Again and again I spoke to the 'Champion,' begging him to call me just half the bad names I gave myself. He was too consoling, and said, 'Bime-by sir, bime-by; you bide a little and then they'll come to your fly.' Hitherto, the trout fled at sight of my tail fly. It was called 'Red Spinner.' I caught the natural insect, and when I compared it with my artificial, my cloud vanished—my fly was an utter montrosity, a hash of three or four insects together.

"Then were my eyes opened, and I minded me of you; I sent for yours, and it is now before me, as true to nature as art can make. I go forth with it, and some fine day I'll tell you of its victims.

"Yours faithfully,

"ROBERT ELLIS.

"Messrs. Foster Bros."

From the Original Proprietor of the Fishing Gazette.

"Barnsbury, July 21st, 1877.

"Dear Sirs,

"The flies ordered came duly to hand. Speaking as a practical fly-fisher of twenty years' experience, I must say I have never seen better

In ordering, please quote List Nos. of articles required.

than those you have forwarded. I shall most certainly recommend them to my immediate friends.

"Sincerely yours,

"T. F. LEMARE."

"October 21st, 1883.

"Dear Sirs,

"Please execute the enclosed order for flies per return, as this month is far advanced, and I prefer it for grayling fishing to any other. I have discontinued ordering from other makers, for those supplied by you I find kill the best. Their equal I have never found, though I have been a fly-fisher for upwards of twenty-five years. Send them per return, as I intend trying a day on Saturday.

"I am,

"Yours truly,

"R. THOMAS."

"3, Grove Crescent, Kingston-on-Thames.

"Lieut.-Colonel Rich encloses a P.O. order for 18s., in payment for the flies sent by Messrs. Foster, and particularly wishes to add he is very much pleased with them."

"The Manor House, Barrow-on-Trent.

"Sirs,

"The flies last sent are simply perfection. I killed a lot of fish with the 'Earwig' pattern (having the true golden shade through the fibres of the tackle) from the Trent, mostly chub and dace, fishing from my lawn.

"Yours, &c.,

"FRAS. LEY.

"August 29th, 1882."

In ordering, please quote List Nos. of articles required.

From H. Bradfield, Esq., Hon. Sec. King's Lynn Angling Association.

"9th April, 1883.

"Dear Sirs,

"Enclosed I send postal order for 7s. 6d. for flies received. They are splendid samples of the art. You will have further orders from this neighbourhood, as all who see admire the upwinged patterns, which have every qualification for dry fly-fishing, being well-feathered and up-winged.

"Yours faithfully,

"H. BRADFIELD."

"Marton, Rugby,

"18th April, 1882.

"Dear Sirs,

"The 'Acme' line and flies you sent me are safely received, for which I am much obliged. I think the May flies extremely well tied and imitated. Some I bought in London are not fit to be placed by them, the contrast in their relation to nature is so great.

"CYRIL G. C. WRIGHT."

"2, High Street,

"Camden Town, London, N.W.

"I am very pleased with the flies, which are exactly to my wishes, the colours being cleverly reproduced from nature.

"J. ROGERS.

"May 10th, 1886."

"Stock Park, Ulverston,

"April 10th, 1886.

"Will you kindly send me a list of your artificials. A friend here has a few of your flies, and more perfect imitations of nature I have never seen.

"J. W. DEAKIN."

In ordering, please quote List Nos. of articles required.

"The Court House,

"Wigmore, Kingsland,

"Herefordshire.

"These are the best I have ever used, and I have fished the rivers about here more than thirty years.

"C. J. C. PRESCOTT.

"May 10th, 1886."

"Elm House,

"Gravelly Hill,

"Birmingham.

"When your flies have once been tried, no further recommendation is needed.

"W. HOWARD AVERY.

"July, 1886."

"Stowe Cottage,

"Chartley, Stafford,

"May 27th, 1885.

"You must include half-dozen at least of your 'Green Drake,' of the exact pattern I send you, it being, I think, one of the very best I ever tried, as I killed seventeen brace of trout in a few hours last season with one.

"F. S. PERKIN."

"Bank House,

"Leek, Staffordshire,

"May 4th, 1885.

"I duly received the half-dozen Flies, and I must say they do you great credit. I don't think I ever saw neater made flies.

"G. DAVENPORT."

" Stainton Hall,

" Caister,

" April 22, 1885.

" Fishing for three hours the other day, I took nineteen brace of trout, all with your March Dun and Cockwing.

"ARTHUR BENN."

" 5, Victoria Road,

" Stafford.

" The Flies you sent me are very satisfactory, and are the best imitations I ever saw.

" W. ROBINS.

" October 11th, 1886."

" The Pines,

" Budleigh Salterton, S. Devon,

" July 26th, 1886.

" The Caterpillars down here are nothing less than marvels for killing, so much so, that I have only confided to one friend, Dr. Evans here, a brother *Medico*, their special use, as I am almost afraid they might be interdicted. With the first I gave him, he killed a nice dish of good trout, and a salmon peal of $2\frac{3}{4}$ lbs. I think I can fairly say I have killed over sixteen brace of big trout with three of them. I am reduced now to one, and that shaky, so please send me off six more per return. Please let me have the Caterpillars by earliest post, as some of the best water I have been on closes on the 31st, and I want to get another decent dish or two before closing day.

" J. KINGHAM BELL."

" Oban, N.B.

" Dear Sirs,

" I would thank you to send me four more dozen of the gold-bodied fly enclosed (the Whistler). With this one solitary specimen I

In ordering, please quote List Nos. of articles required.

took 41 trout from one pool a few days ago before coming here. There was not a single fish under 1 lb. in weight. Will most certainly recommend your remarkable flies to all my angling acquaintances.

"Yours, &c.,

"W. ROBERT FOREST."

"Orme House, Westward Ho !

N. Devon.

"I have had first-rate sport with your flies in very clear water.

"F. P. HOPKINS.

"January 4th, 1887."

(Major).

"Rowsley, Bakewell,

"October 9th, 1886.

"The flies to hand are beautifully tied. I am much obliged by your taking so much trouble about them. I know no floating fly equal to them.

"MAJOR E. LEVETT."

"Clarence Cottage,

"Hampton, Cambridgeshire.

"I was delighted to receive your second packet this morning. The flies you have sent me are just what I want, and well tied.

"A. J D. CHAPMAN."

AN IMPROVEMENT ON GUT.

A NEW DISCOVERY.

The new Web Steel Fibre, by a new process, is drawn almost half the thickness of the finest gut, and is annealed to the medium degree of malleability. It in the fine size alluded to withstands a dead strain of full 3lbs. weight (which is equivalent to a fish double the weight with water, and a pliant rod as sustaining mediums.) *No finest-drawn gut will stand the weight* named. This colour is the dull smoke-blue of ordinary stained gut. When viewed at a distance of a few feet it is invisible. Its chief value to the fly-fisher is for droppers, which, when dressed on the Web Steel Fibre, never cling or entangle round the line. They hang sufficiently pliant to enable user to fish in comfort. For midwater and bottom fishing the new substance is as great an advance on refined gut in point of strength, for bulk and thickness, as gut was over the horse hair, and the Indian grass or weed of our forefathers.

Flies may be had dressed on above at our usual prices for flies on gut.

In ordering, please quote List Nos. of articles required.

FOSTER'S NEW INVISIBLE DOUBLE HOOKS.

The following extract and illustrations are cut from Mr. Cholmondeley Pennell's latest work—"Modern Improvements in Fishing Tackle."

"INVISIBLE DOUBLE HOOKS."

One other ingenious novelty may be briefly noticed—Messrs. D. and W. H. Foster's "Invisible Double Hook," to which various advantages

are ascribed. The most prominent is indicated in its name. A May-fly dressed on these hooks is represented above, and the cuts below illustrate the appearance of the fly and position of the double hooks in relation to wings, &c., when seen (A) from above, and (B) from below, when on water. The inventors claim that in the latter case "the hooks taking a horizontal position, whilst the wings and legs are outlined perpendicularly, the former are not 'outlined' at all."

A.

B.

FOSTER'S INVISIBLE DOUBLE HOOK.

From the *Field*, September 18th, 1886.

"Messrs. D. & W. H. Foster, of Ashbourne, have introduced a new fly-hook, which is stated to have answered well where tried. They are, in point of fact, two hooks, so placed in the body of the fly that both are said to be invisible to the fish. This is the advantage claimed for the invention, and, indeed, its excuse. The wings and legs float horizontally in the water, thus obscuring the two hooks, which are made of unusually fine wire, so that the double hook (brazed) weighs scarcely more than an ordinary single hook."

In ordering, please quote List Nos. of articles required.

From the *Fishing Gazette*, September 25th, 1886.

FLIES ON INVISIBLE HOOKS.

“We said just now it was not Messrs. Foster’s fault if there was nothing new under the sun ; they are continually striving after novelty. The amateur angler sighed for an invisible hook on invisible gut, and here, according to Messrs. Foster, is the very thing. If trout have eyes like other mortals, then we greatly fear, Messrs. Foster, they would call you ‘visionary enthusiasts’—instead of one hook you give us two, and call them invisible ! Joking apart, these flies are dressed on extra fine wire double hooks, and very good ones too. We have seen genuine testimonials from anglers who speak most highly of these fine double-hooked flies, and we hope to give them a personal trial later on.”

From the same journal a fortnight later.

“We sent some of Messrs. Foster’s fine wire double-hook trout-flies to a friend in the West of England, whose opinions we have every confidence in, and he writes as follows :—‘I have given Foster’s double-hook flies a good trial. The Red Spinner and Sand Fly being the taking flies during the last two or three weeks, I had a good opportunity of comparing them with the single hooks. I think them a great advantage, particularly at the end of the season, when the fish take under water and rise so ‘short’ ; but the peculiar feature about them is that they hook the fish in the *upper jaw*. I took particular notice how each fish was taken. In one instance both hooks were in the angle of the mouth ; but in every other case the fish was hooked in the roof of the mouth by one hook only, and certainly more firmly hooked than with the ordinary single-hook fly. Of course, these small fine wire hooks will not stand wear so well as a single hook of stouter wire.’”

From the *Free Press*.

“Fly fishers for trout have long sighed for a fly tied upon an invisible hook upon invisible gut ; and sighed in vain. Now, according to Messrs. Foster, of Ashbourne, they have discovered the first part of

In ordering, please quote List Nos. of articles required.

their want. These celebrated fishing-tackle makers have introduced a fly, tied upon a double hook, brazed, which they describe thus:—"The hooks are placed horizontally in the body of the fly, and the advantage of this plan quickly manifests itself in practice—one bend is in the water, and the other perpendicular, and thus *both hooks are invisible to the fish.*"

Mr. W. H. Aldam, Editor of "A Quaint Treatise on Flies and Fly Making, writes :

Please find cheque enclosed for the Invisible Hooked Flies. My son had great success with them, though the water and weather has been so fearfully fine and bright.

"Winchcomb, Winchester, Hampshire."

'Littleborough, near Manchester,

"July 21st, 1885.

"Please find postal note and stamps for amount owing to you for Invisible Double-hooked Flies. I am much pleased with them. I was out with a party the other evening, and was the only one who landed any fish. I fancy if you dressed your single hook flies with wings on side of hook they might prove good. I think it worth a trial. I may say that I prefer your flies to any I have tried. The cost is a little more, but the flies are more satisfactory.

"JOHN HEAP."

Want of space forbids more press extracts and testimonials being printed.

FLUTTERING OR REVERSE WINGED FLIES.

"In 1883 Messrs. Foster brought out Flies in which the wings were reversed as shown in the cut.

SPECIMEN FLY ENLARGED.

"Since then this method of fly dressing has been, we see, rediscovered and patented in America. These flutterers would evidently dry well, and the wings would stand out well. They are really beautifully made."—*Fishing Gazette*, Sept. 25th, 1886.

THE FLUTTERING FLY.

From Mr. A. N. Cheney, author of "Fishing with the Fly," &c. :

"THE FLUTTERING FLY.—Editor *Forest and Stream*. In *Forest and Stream* for June 10, '86, I find a cut and description of a fly that Mr. Holberton is stated to have invented and that Mr. Imbrie has patented. In April or May, 1883, Messrs. D. and W. H. Foster, of Ashbourne, England, sons of the late David Foster, author of 'The Scientific Angler,' sent me flies tied exactly as the 'Fluttering Fly' is represented in the cut above mentioned. The Messrs. Foster did not write of these flies as being new or strange, but merely included them with other flies without comment. How long they have been so fashioned in England previous to 1883 I have no means of knowing at present.

"A. N. CHENEY, Glens Falls, N. Y.

In addition we now make the following variety of reverse winged artificials, specially suitable for fine, clear, and well whipped waters, the hook being well obscured :—

Special Local Flies for the best known Rivers, Lochs and Loughs, sent per return post.

SALMON FLIES.

THE BLUE MACAW (LARGE SIZED FLY).

“The great thing to keep in the mind’s eye when choosing or constructing a salmon fly, is the shine *through* the feathers, wool, mohair, &c., when held above the head, and thus viewed from beneath.

“Some dressings are of almost one universal dull shade, or no shade

In ordering please quote List Nos. of articles required.

at all, when held in the posture seen by the fish ; others will have the colour rightly seen shining through in a few patches ; but the correct thing is to get the whole of the legs, tail, and body to shine brilliantly through, as well as when looked down upon, and the fault will be none of the fly's if it be refused by the fish. The materials used for salmon flies are specially picked with a view to their effect when seen from below ; as for instance, the hard-to-be-procured pig's wool, which for transparency of shade stands well-nigh unequalled ; also mohair, which, though of finer texture, possesses the same characteristics. These, when well placed upon the hook shank, shine most effectively when wet, and viewed from below."—*Scientific Angler*, page 161.

Salmon flies exist in endless varieties ; the following are, however, well-known killers of universal reputation. The quality of the materials used and the excellence of the workmanship displayed in our List of Famous Salmon Flies has gained us as makers world-wide reputation.

SPECIAL FLIES FOR SPECIAL WATERS.

BEING THE PATTERNS OF LOCAL NOTABLE FISHERMEN.

We dress the best known local flies for North Country, Irish, and Welsh waters—exact in point of size and colour, but far superior in workmanship, to what may be “got on the banks.” New improvements, such as rustless hooks of approved bends, eyed or otherwise, have been largely adopted by us of late. These changes, coupled with perfection of neatness of dressing, and quality of material, will leave no scope for successful competition.

As examples, we particularise and quote price of flies for several salmon rivers of note.

THE ABERDEENSHIRE DEE.

| | | | Small. | | | Medium. | | | Large. | |
|----------------|-----|-----|--------|----|-----|---------|----|-----|--------|----|
| | | | s. | d. | | s. | d. | | s. | d. |
| The Tartan | ... | ... | 1 | 9 | ... | 2 | 0 | ... | 2 | 4 |
| „ Grey Eagle | .. | ... | 1 | 6 | ... | 1 | 9 | ... | 2 | 0 |
| „ Yellow Eagle | ... | ... | 1 | 8 | ... | 1 | 10 | ... | 2 | 3 |
| „ Childers | ... | ... | 1 | 6 | ... | 1 | 8 | ... | 2 | 0 |

The above are local flies. In addition, well known flies of general repute are Jock Scot, Silver Doctor, Popham, Butcher, Spanker, &c., all of which latter are brighter in colour than the purely local special flies. The “Generals” are used when the “Weals” fail to “fetch” fish.

In ordering, please quote List Nos. of articles required.

As an Irish river, we select

THE SUIR,

the flies on which water are used very small.

| | | | | Small. | | Medium. |
|-------------------|-----|-----|-----|--------|----|---------|
| | | | | s. | d. | s. d. |
| The Crane | ... | ... | ... | 1 | 0 | 1 6 |
| „ Shannon | ... | ... | ... | 1 | 6 | 1 10 |
| „ Old Blue | ... | ... | ... | 1 | 3 | 1 9 |
| „ Blue and Orange | ... | ... | ... | 1 | 2 | 1 6 |
| „ Mystery | ... | ... | ... | 1 | 6 | 1 9 |
| „ Golden Green | ... | ... | ... | 2 | 0 | 2 3 |

The best general flies being the Durham, Ranger, Blue and Silver Doctors, Jock Scot, Tam O'Shanter, and the Spanker.

For Wales we will instance

THE DOVEY,*

the flies on which river are usually used medium in size.

| | | | | Small. | | Medium | | Large. |
|----------------------------|-----|-----|-----|--------|----|--------|----|--------|
| | | | | s. | d. | s. | d. | s. d. |
| The Baker | ... | ... | ... | 1 | 2 | 1 | 6 | 1 10 |
| „ Captain (Welsh Dressing) | ... | ... | ... | 1 | 4 | 1 | 8 | 2 0 |
| „ Powell's Fancy | ... | ... | ... | 1 | 6 | 1 | 9 | 2 0 |
| „ March Imp | ... | ... | ... | 1 | 6 | 1 | 9 | 2 0 |
| „ Fiery Brown | ... | ... | ... | 1 | 3 | 1 | 6 | 1 9 |
| „ Welshman's Fairy | ... | ... | ... | 1 | 6 | 1 | 9 | 2 0 |
| „ Silver King | ... | ... | ... | 1 | 0 | 1 | 3 | 1 8 |

The more sombre kind of general flies are suited to vary with local patterns on this river, such as the Spey Dog, Tam O'Shanter, Wasp, Brown and Orange, Ranger, &c.

Special Salmon Flies made to order, in lots of not less than two of each special description or pattern.

* We are indebted to Mr. Fred Yates, of Neath, for several first-rate Sewen and Salmon patterns for this river.

FOSTER'S "WOOLLEY BEAR" OR CATERPILLAR,
FOR SUNK FLY-FISHING FOR SALMON, SEA, AND BROWN TROUT.

This is found to be the best lure it is possible to use on a fly cast. It is not loaded, but it is of the weight and make of an ordinary palmered fly. It will kill almost equally well in bright, clear, and still water, well whipped over fish, as it will in a "spate" or fresh. A rich fiery brown is the prevailing colour, the feather fibres thus show a brilliant colour when held in a position for the eye to look through them. We have inserted a few extracts from reports of fishermen who have used them, elsewhere; we add a couple further. These and more may be seen on application, in full, as received:—

"Garynakine Inn, Stornaway, N.B.

"I have taken, out of a total of 19 salmon, 12 of them with your salmon sized caterpillar, and these not from broken water, but still pools. I can kill with this on this water when all others I try fail.

"E. N. WOODHAM.

"July 20th, 1882."

"Chesterton Villa, Chertsey Road,
"Clifton, Bristol.

"I find salmon take your 'Woolley Bear' or Caterpillar *well*. I have landed some good fish with them. Pray tie me some on larger hooks than the last, as the fish occasionally are too big and heavy for the light and rather little hooks on the last lot.

"GEORGE A. CUYLER (Colonel)."

| | Small. | | | Medium. | | | Large. | |

| 1159 | „ four-gut twist | | | | 42/0 |
| 1160 | „ plaited three-gut | 13/6 ... | 19/6 ... | 25/0 ... | 35/0 |
| 1161 | „ taper half-twisted gut and half-single salmon ... | 9/0 ... | 18/0 ... | 22/0 ... | 30/0 |
| 1162 | „ extra stout single | 9/6 ... | 19/0 ... | 24/0 ... | 36/0 |
| 1163 | „ half-treble gut and half- doublegut, finely tapered | 9/0 ... | 18/0 ... | 22/0 ... | 30/0 |
| 1164 | The new spliced (knotless), stoutest single gut traces (patent), 2 yards, 2s. 9d., 3 yards, 4s. each. | | | | |

The above is the latest improvement in Salmon traces. There is an entire absence of knots, and as at these breakages almost invariably occur, the chances of loss and disaster are in the case of the improved casts reduced to a minimum.

Hair Casts made to order, 3 yards, 6d. each.

The gut used in making the above is *new*, being in all cases of recent importation. We obtain our gut direct from the manufacturers, and as their best blends only are reserved for us, we can thoroughly commend them to our customers. The XXX fine undrawn cast is now used by the best fly-fishers of the day.

For grayling and very fine trout fishing our new "Climax" cast is the very acme of perfection, constructed from 17-inch gut, finely tapered, and put carefully together without speck or blemish. There are less knots, fewer chances of breakage, and by the beautifully gradual taper, the tendency to entangle is immensely diminished, and the prospects of sport in like ratio enhanced. The price of our special long-length "Climax" cast (534) is 16/6 per dozen. All our casts are tested prior to being put in stock.

FLY BOOKS.

FOSTER'S
NEW FLY BOOK

THE "CRITERION."

A. and B.—Large pockets for casts and sundries.

C.—Recess for Scissors.

D.—Reverse side of all leaves in book Flannel lined for loose flies.

E.—Flies arranged (named and numbered) for whole Season.

F.—Comments as to their seasons, &c., for use by the Author of the "Scientific Angler."

The above Celebrated New Fly Book, fitted up systematically with flies for the whole season, with one-quarter dozen each of 48 different sorts, being a perfect list of the most prominent killers for the 8 months, commencing with March and ending with October, with 8 pages of printed instructions on parchment. The flies will kill on all clear streams in which trout and grayling abound. There is accommodation for myriads of loose flies; also large pockets for casts, &c. The whole comprising by far the most *elaborate, valuable* and *ingenious* Fly Book every introduced to the angling world. Book only, with instructions, 6½ in. by 1¼ in., in Russian leather, 15s. 6d.

1165 Price of book and flies, 39s. 6d. Quotations for larger number of each seasonable fly fitted in the new books sent on application.

1166 Ditto double number of pages, or with double contents, specially got up for Salmon, fitted with twenty-four varieties of the best known salmon flies for loch and river use, with intervening

SPINNING MINNOWS.

The following comprises *all* the best baits used in trout, salmon, and pike fishing. No one is inserted here, and kept in our stock, without our having thoroughly tested its killing capabilities repeatedly. We can, therefore, recommend the baits quoted for as being sterlingly good for the purpose for which they are constructed.

FOSTER'S NEW "PEARL" BAIT.

The above bait is the nearest approach to a small living trout that has yet been introduced. It kills well in clear and as well in flushed water. It is transparent, and has the weight at the head, which causes the bait to head towards the bed of the water when the line is eased in the act of spinning. As a trout, salmon, and pike killer, it is a great advance over all and every other spinning bait yet invented. *Vide* the reports from the leading Fishing Stations, appearing weekly in the chief British and other Sporting Journals.

NO.

- 1222 Trout sizes, $1\frac{1}{8}$ in. 1s. 10d. ; $1\frac{1}{2}$ in. and $1\frac{3}{4}$ in., 2s. 1d. ; salmon and pike, $3\frac{1}{2}$ in. and 4 in., on treble gut or on fine gimp, 3s. 6d. and 4s.
- 1223 The Derby Trout Killer, $1\frac{1}{2}$ in. and $1\frac{3}{4}$ in., 2s. ; $2\frac{1}{2}$ in., 2s. 6d. ; 3 in., 3s. ; $3\frac{1}{2}$ in., 3s. 6d. ; and 4 in., 3s. 9d. ; 4d. and 6d. extra if traced.

The above renowned bait is particularly successful in clear running streams. It has been used in the Midlands for forty years past, and holds its own still, though the ever extending list of "artificials" have long ago outnumbered the numerical varieties of naturals in fresh waters.

Solid Metal Derby Killers are supplied at same prices.

In ordering, please quote List Nos. of articles required.

NO.

- 1224 Improved German Silver Heavy Devon Bait, 1 in., $1\frac{1}{4}$ in., and $1\frac{1}{2}$ in., 1s. 6d.; $1\frac{3}{4}$ in. and 2 in., 2s.; $2\frac{1}{4}$ in. and $2\frac{1}{2}$ in., 2s. 6d.; $2\frac{3}{4}$ in. and 3 in., 3s. each; $3\frac{1}{2}$ in., 3s. 6d.; 4 in., 4s.

This Devon is the best killing of all Devons, and perhaps of all baits for discoloured water. It is of solid white metal, and can be scraped to the needful degree of brightness with the back of a knife without injury. The yellow-white of the metal employed in above kills much better than the too glaring silver-washed brass baits so generally sold.

- 1225 Ordinary Devons, 1 in., 1s.; $1\frac{1}{2}$ in., 1s. 3d.; $1\frac{3}{4}$ in., 1s. 6d.; 2 in., 1s. 9d.; $2\frac{1}{4}$ in., 2s.; $2\frac{1}{2}$ in., 2s. 3d.; 3 in., 2s. 6d.; $3\frac{1}{2}$ in., 2s. 9d.; 4 in., 3s.

- 1226 Gregory Bait, $1\frac{3}{4}$ in., 2s., Trout; $2\frac{1}{2}$ in., 2s. 6d.; 3 in., 3s.; $3\frac{1}{2}$ in., 3s. 6d., Salmon and Jack,

- 1227 The *Fishing Gazette* Bait (metal), 2s.

- 1228 Foster's Excelsior Solid Metal Bait Hooks (for illustration see Plate II., fig. 6), mounted without gut or gimp, $1\frac{3}{4}$ in., 2s. 6d.; $2\frac{1}{2}$ in., 3s.; 3 in., 3s. 6d.

- 1229 The "Wiggler" Jointed Bait, 2 in., 2s. 9d.; $2\frac{1}{2}$ in., 3s.; 3 in., 3s. 6d.; $3\frac{1}{2}$ in., 4s. 6d.

- 1230 Brown's Phantoms—Size 0, 2s. 6d.; size 1, 2s. 9d.; size 2, 3s.; size 3, 3s. 6d.; size 5, 4s.; and size 6, 4s. 6d., either leaded or otherwise.

In ordering, please quote List Nos. of articles required.

NO.

- 1231 The "Reliable" Phantom—Size 0, 2s. ; size 1, 2s. ; size 2, 2s. ; size 3, 2s. 6d. ; size 4, 2s. 6d. ; size 5, 2s. 6d. ; size 6, 2s. 6d. ; size 7, 3s. each.
- 1232 Ordinary ditto—Size 0, 1s. 8d. ; size 1, 2s. ; size 2, 2s. 3d. ; size 3, 2s. 6d. ; size 4, 2s. 9d.
- 1233 Minnows for use with fly-rod and on fly-cast, 4d., 6d. and 9d. each.
- 1234 The "Sylph" Minnow—No. 1, 1s. 6d. ; No. 2, 1s. 6d. ; No. 3, 1s. 9d. ; No. 4, 2s. 6d. ; No. 5, 3s. each. This bait is of horn. It is a realistic imitation of a natural bait. It is used generally with the fly rod at twilight in the hot months, when it is often most deadly. The larger sizes are particularly deadly when used trailing at the extremity of a long line from a boat for sea trout and salmon.

- 1235 The Garnet Quill Minnows—No. 1, 1s. 6d. ; No. 2, 1s. 6d. ; No. 3, 1s. 9d. ; No. 4, 2s. 6d. each.
- 1236 Foster's "Universal Killer"—1½ in., 2s. ; 2½ ins., 2s. 6d. ; 3 in. 3s. ; 3½ in., 3s. 6d. ; 4 in., 4s. 6d. each, mounted. This bait spins from the tail, as will be seen on referring to plate II, where illustration is given (fig 7). In narrow streams, trout often miss a bait having the spinning flanges at the head, the fish dashing at the head of the bait from close quarters, hits the revolving ears or flanges, which then act as guards for the hooks. This is entirely obviated in the minnow referred to.

In ordering, please quote List Nos. of articles required.

FIG. 7

FIG. 8
THE SAFETY BAIT CASE

SPINNING AND OTHER BAITS FOR PIKE.

The larger sized baits in the preceding range are adapted for pike, as well as salmon, trout, perch, &c., but the following are more particularly, and specially pike baits. Colours that are found to be seductive in the case of trout, are found to be of "no account" in the case of pike. Vermillion for instance is not a killing colour on a trout bait, and is not used except to portray the specks on the back of the fish named, and these are not vivid in action. In the case of Jack the facts are reversed, as the whole *Esox Lucius* family "go" for vermillion when judiciously laid on, like a bull for a red rag, though with an intent widely different. It goes without saying that a change of colour is good occasionally, but we find that in our own experience, and in that of the vast majority of our numerous clients, this change of colour is absolutely necessary in clear water fishing to ensure *a continuance* of sport over the same ground, or rather water.

- 1237 The "Clipper," No. 1, 1s. 6d. ; No. 2, 2s. ; No. 3, 2s. ; No. 4, 2s. 6d. ; No. 5, 2s. 6d. each.
- 1238 The "Sportsman," 2½ in., 2s. 6d. ; 3 in., 3s. ; 3½ in., 3s. 6d. ; 4 in., 4s. each.
- 1239 The "Torpedo" Devon, a new and very heavy bait, specially adapted for pike, 2 inch, 2s. 3d. ; 2½ inch, 2s. 6d. ; and 3 inch, 3s. 3d.
- 1240 The "Shadow" Bait, Registered, No. 1, 9d. ; No. 2, 1s. ; No. 3, 1s. 3d. ; No. 4, 1s. 6d. ; No. 5, 1s. 6d. each.
- 1241 The "Perfect" Spinner, either gilt or silvered, No. 1, 1s. 8d. ; No. 2, 1s. 10d. ; No. 3, 2s. ; No. 4, 2s. 6d. each.

GUDGEON REDUCED.

In ordering, please quote List Nos. of articles required.

NO.

1242 "Artificial" Dace and Gudgeon, No. 1, 1s. 9d.; No. 2, 2s.;
No. 3, 2s. 3d.; No. 4, 2s. 6d.; No. 5, 3s.

THE "COLORADO."

1243 The "Colorado" Spoon, 1s. 3d.; 1s. 6d.; 1s. 9d., and 2s. each.
The above has the weight inside the spoon, and also extra spinning flanges. We hear of a clergyman of our acquaintance being towed about for over an hour in a punt on a pool by a pike, that afterwards proved to be a little over 30 lbs. The "Colorado" was the bait used. The large triangle is best obscured in a tassel of bright wool, or in a feather tag.

1244 The "Norwich" Spoon, with or without tassel, size A, 1s. 3d.;
B, 1s. 6d.; C, 1s. 9d., and D, 2s.

In ordering, please quote List Nos. of articles required.

- 1245 Ordinary Spoon Baits, Traced, size 1, 6d.; 2, 8d.; 3, 10d.; 4, 1s.; 5, 1s. 2d.; 6, 1s. 4d. each.
- 1246 Artificial Lampreys, transparent and well mounted, with strong but delicate hooks. The most natural Lamprey yet made. $2\frac{1}{2}$ inch, 1s.; $3\frac{1}{2}$ inch, 1s. 6d. each.
- 1247 The "Eclipse" Sand Eel. This bait is far and away superior to any bait of similar shape now in use. It is of Buffalo horn. It is a deadly spinning bait for salmon, &c., in estuaries, as well as for ordinary sea fishing— $2\frac{1}{2}$ in., 1s.; 3 in., 1s. 4d.; $3\frac{1}{2}$ in., 1s. 6d.
- 1248 Pike Flies, 9d., 1s., and 1s. 6d. each.
- 1249 Artificial Frogs, hollow rubber, each 1s.

SPINNING TACKLE, FOR NATURAL BAIT.

- 1250 Foster's Minnow Tackle, new arrangement (Trout). See plate III, figs. 1 and 2. Complete with swivel trace, Trout, 1s. 5d. Salmon and Pike, 1s. 10d. each.
- 1251 "*Fishing Gazette*" (see plate III., fig 3) Tackle, 2s.; Pike and Salmon, 2s. 6d. each.
- 1252 New Improved Archimedean Pike and Trout Tackle, see plate III., fig 4. This is made to admit of the hooks being altered to suit the length of bait used precisely. They are needed therefore in but two sizes—one for Trout at 1s. 6d., and one for Salmon and Pike at 1s. 9d.

In ordering, please quote List Nos. of articles required.

- 1253 Ordinary quality, Archimedean Pike and Trout Tackle, ditto, as illustrated below.

Price—No. 1, 1s.; No. 2, 1s. 2d.; No. 3, 1s. 4d.; No. 4, 1s. 6d.

- 1254 *Foster's "Unique" Drop Minnow Tackle (improved). The sets of triangular hooks upon this tackle are but two in number, but they are found to be ample for minnow "dipping" under bushes, &c., as well as for ordinary spinning in clear water. The above tackle works well in fine and clear water when the minnow is usually vetoed as being out of all question.

- 1255 Morris' New Spinner for natural minnow or gudgeon, &c. Price—small, for trout, 1s. 3d.; medium and large, for Salmon and Pike, 1s. 8d.
- 1256 Pennell's Snap Tackles, 10d.; 1s.; and 1s. 3d. traced.
- 1257 Pennell's Spinning Tackle, Trout, 1s. 3d.; Pike, 1s. 6d.
- 1258 F. Francis' Spinning Tackle, 1s. 3d. and 1s. 6d.

* This is an entirely new tackle for live bait, and is strongly recommended. It causes the bait to take a straight flight through the water, which is transcendently superior to the cork-screw motion given by a turned tailed bait. The rod is inserted down the mouth of the minnow, the nose being brought inside metal head c; the hook i being then inserted through the hole made for same. The illustration shows pike and salmon size.

In ordering, please quote List Nos. of articles required.

FIG. 1 NEW MINNOW TACKLE

FIG. 2

SWIVEL LEAD

FIG. 3 FISHING GAZETTE TACKLE

FIG. 4 NEW PIKE TACKLE

FIG. 5 OLD PIKE TACKLE

In ordering, please quote List Nos. of articles required.

NO.

1316 Gold Medal Trousers, International Fisheries, Price 36s. 6d.

1317 Ditto Stockings, first best quality, 24s. 6d.

GUIDE FOR MEASUREMENT.

In ordering, the length of foot and leg alone is ordinarily guide sufficient, but if a particularly neat fit is needed, it will be ensured by sending measurement from A to A and B to B, &c., &c.

There is perhaps nothing of greater importance in the angler's equipment than that his waders should be really well made, so as to be wear-resisting and water proof, and thus reliable for an indefinite period. What can be more tantalizing than to find, when, say from 80 to 100 or more miles from a source of supply, ones wading gear gone to the bad. Provided with well and honestly made articles, constructed from the best quality sheet rubber and cloth only, a wanton want of care alone, barring accidents, is the only source from which an inconvenient and irritating hitch can come. We can vouch for the satisfactory character of all the waterproofs we have described above. The lowest priced waders quoted for are equal to what are generally sold as "best," whilst the higher qualities are transcendently superior to any in the market.

1318 Fishing Socks for use over waders, very thick, all wool,

| | | | | | | | |
|----------|-----|-----|-----|-----|-----|----|---|
| per pair | ... | ... | ... | ... | ... | s. | d |
| | | | | | | 2 | 6 |

1319 Belts and Braces for waders, made of strong 2-in. brown

or slate webbing, and with good leather mounts.

Price—Belts, 2s. 6d. each ; braces, per pair, 4s. 6d.

Extract from the "*Field*," April 3rd, 1886.

BROGUES—"Most anglers have found, sooner or later, the danger arising from the gradual disappearance of the spikes or hobs by which foothold upon slippery boulders is maintained. The "Test" Fishing Brogue (registered) admirably meets this requirement by having the nails clenched by a special process. The brogues are made of the best Scotch hide throughout, but the sole is built up of solid leather and prepared felt, firmly rubbered together, so that it is one solid piece, and cannot be softened by immersion in water for any length of time. In every detail the workmanship warrants confidence in a maximum of wear."

* Four editions of this work have been issued in four years from date of publication—the greatest success in angling literature. The American edition, edited by W. C. Harris (editor of the "American Angler,") same price as the home issue. See Reviews at end of list. A few copies of the 2nd edition will be cleared at 6s.

WATERPROOF FISHING COATS AND CAPES, &c.

THE IMPROVED BUCKLAND FISHING
AND SHOOTING JACKET.

Entered at Stationers' Hall.

THE INVERNESS FISHING AND SHOOTING
CAPES.

Entered at Stationers' Hall.

1353 The Buckland Jacket is extremely light, it is constructed from highly superfine twill material, and is thoroughly ventilated. Can be quickly shortened at will for wading with Trousers. Price 42/-.

“The Angler's Waterproof, which draggles in the stream when wading, which clings tightly to the shoulders, and which allows the rain to trickle up the arms, is a delusion and a snare. The improved “Buckland” Fishing Jackets are designed to remove this cause of irritation. They

In ordering, please quote List Nos. of articles required.

are made 33 in., 35 in., and 37 in. long, and though intended to come to the top of fishing boots or stockings, can be shortened into a mere jacket for wading trousers, and the pockets are placed so as to be free for use when shooting, and are thoroughly ventilated, have inner elastic cuffs in the sleeves and storm-proof fly."—*From the Field, April, 1886.*

- 1354 The Inverness gives greater freedom to the action of the arms in casting than the Capes as usually made. It has elastics to put the arms through, so that the fly of the cape is thus brought under control, and retained in the position needed in every movement of the arms. Price 24s.

Soup.

Consists of the finest vegetables and extract of beef in a dry state.

It's an easy soup to make;
It's a right good soup to take
We are very wide awake,
The mistress and I.

MAKE with little trouble, excellent Soups—Brown and White. The Vegetable Soup used with the liquor in which fowls have been boiled, or made as a Vegetarian dish with milk, will be found superb. Handy and economical as a basis, or stock, for all soups. Hashes, stews, and soups requiring body will be found greatly improved where these soups are used for the purpose. Flour, which is the substance commonly used for thickening, detracts from the natural flavour of the soup, while Edwards' Soups not only leave that flavour unimpaired but add to them a sweetness and delicacy of flavour obtainable in no other way. An exquisite addition to Irish Stew, which, when these soups are used, may be made without meat, and in this form will be found a delicious light supper dish. If your Grocer does not keep it, $\frac{1}{2}$ lb. of each will be sent free for 18 stamps, or a sample of both, sufficient for a pint of each, for $3\frac{1}{2}$ d. in stamps. They are sold in canisters, 1 lb., 1s. 3d.; $\frac{1}{2}$ lb., 8d.; $\frac{1}{4}$ lb., $4\frac{1}{2}$ d.; the Vegetable $\frac{1}{4}$ lb., 4d., by all Grocers.

FREDERICK KING & Co., Limited,

SOLE MANUFACTURERS,

CONTRACTORS TO HER MAJESTY'S GOVERNMENT,

26, Waring Street, Belfast, and 6, Bishopsgate Avenue, London, E.C.

HOUSEKEEPERS will find it invaluable, as it can be used in preparing Gravy for made dishes, or as an addition to stock, and also in the more solid form of Pasties, Rissoles, &c.

Third English Edition. Crown 8vo. (Enlarged.) With numerous engravings, and with the addition of over FIFTY HAND-COLOURED PLATES of natural flies and the artificial copies.

CROWN 8vo. PRICE 7/6 POST FREE.

"The new coloured plates of both this and Mr. Halford's work must certainly eclipse those contained in any earlier work."—*Field*. "Goes thoroughly into the science of angling."—*Natural Science Journal*. "Is lively and readable, and it deserves its success."—*Saturday Review*. "The book is worthy of a place in the library of every disciple of Izaak Walton."—*Land & Water*.

Four Editions (3 British and 1 Transatlantic) have been issued in less than four years of the

SCIENTIFIC ANGLER.

BY THE LATE DAVID FOSTER.

THIS BEING THE GREATEST SUCCESS EVER ACHIEVED
IN THE ANNALS OF ANGLING LITERATURE.

Mr. Wm. Senior (Angling Editor of *The Field*) says: "I know of no better authority than David Foster." Mr. R. B. Marston (Editor of *Fishing Gazette*) says: "It is one of the most valuable and important contributions to angling literature which has ever been published." Mr. G. M. Kelson (Angling Editor *Land & Water*) says: The many subjects dealt with are in our opinion cleverly treated." Mr. F. Mather (Angling Editor of *Forest & Stream*, New York) says: "It is a most original and well-written work."

"THE SCIENTIFIC ANGLER."

From "*Bell's Life*," April, 1886.

"The whole of these subjects are clearly and exhaustively treated, and we should say, to use a colloquialism, that what the author did not know about fishing and fish was not worth learning. Then "*The Scientific Angler*" is profusely illustrated, the various artificial and natural flies being depicted with a delicacy and fidelity that will be difficult to surpass. 'This very advanced work is not a new book, but a new edition of a well-tried and deservedly popular one. It is issued by Messrs. Bemrose and Sons, 23, Old Bailey, in a handy and compact form, and we can warmly recommend it to all anglers, whether veterans or tyros, for the former will be wise indeed if this book does not make them wiser, and to the latter—well, we can give no better advice than to buy a copy at once. For the angler who has read Mr. Foster's book—which is the result of half a century of practical experience—and has reduced its principles to practice, need not fear to wield his rod in the best of company. As a classic, and for genial talk and quaint humour, we prefer Walton and Cotton; but, as a scientific manual on fishing, Mr. Foster's book is the best we have seen."

London: Bemrose & Sons, 23. Old Bailey; and Derby.
